

AUSTRALIAN FORESTS SEARCHED FOR LOST FLIERS

Teachers of B. C. Discussing Schools' Progress and Plans

Instructors From All Districts of Province Share in Tenth Annual Convention of Teachers' Federation in Vancouver; Minister Speaks.

Vancouver, April 2.—Teachers from all parts of the Province are in session here this afternoon at the tenth annual convention of the British Columbia Teachers' Federation. The gathering was opened this forenoon in the Vancouver Technical School and this afternoon the delegates and many interested in the Federation attended a special session, starting at 2 o'clock. The speakers were F. Miller, of New Zealand, who spoke of the New Zealand Teachers' Institute, its functions and major accomplishments, and T. W. Woodhead, president of the Federation.

MINISTER SPEAKS
Hon. J. Hinchcliffe, Minister of Education of British Columbia, suggested the teaching of thrift and carefulness in the schools of the Province when he delivered one of the inaugural addresses at the opening of the convention this morning.

The Minister commented first on the waste taking place in the Province, which, he said, exceeded the production of some European countries. This, he suggested, could be overcome by an early training in thrift, which would ultimately become a respect for the conservation of natural resources.

CO-OPERATION ASKED
Mr. Hinchcliffe asked for the co-operation of the teachers in advancing the condition of education. He said his department was friendly toward the new ideas, new methods, new processes, but that balance must be maintained by a consideration of a second force, the duty of both the teachers and department to the people.

A strong anomaly in provincial educational practice was created by the Minister. He said that in the school Act, where no other specific school subjects were mentioned, there was a peremptory clause stating that "the highest moral principles must be inculcated."

No school in the Province fulfilled this mandate, he declared.

DEVELOPMENT WORK
Mr. Hinchcliffe said teaching in British Columbia should tend toward an individualism suitable to the special needs of the children of the Province. He said that the teacher should be a person of high character, one who is properly trained in his own subject, and who is able to develop them.

In making a speech of welcome, Thomas Brooks, chairman of the Vancouver School Board, emphasized the necessity for character, even above ability, in present day teachers.

"Manhood and womanhood are more important than scholarship," he said, "and it is by character in our teachers that we shall gain this in our children."

F. H. PRINCE MAY BE AMBASSADOR
Reported Hoover Considering Boston Banker For U.S. Post in France

Boston, April 2.—The Boston Evening Transcript, in a special dispatch from its Washington correspondent says: Frederick H. Prince, Boston banker, "will be considered by President Hoover for appointment as Ambassador to France," to succeed Myron T. Herrick, who died suddenly Sunday.

Other Washington dispatches have stated that among those mentioned for the Paris post are Hugh Gibson, of California, now Ambassador to Belgium, and Henry P. Fletcher, Ambassador at Rome, who accompanied President Hoover on his South American good-will tour. Former President Charles G. Dawes, who has been mentioned for the post at London, now also is being suggested for the post in France.

COLD STORAGE SCOW TO BE RELOADED
Vancouver, April 2.—The cold storage scow of the B.C. Packers Ltd., which broke adrift from the Steamer Princess last week, is ashore on the west coast of Stewart Island.

The Salvage Princess reports the scow was found with bottom considerably damaged, but the cold storage equipment and superstructure is intact. An attempt was made to reload the scow yesterday during a heavy gale, but without success. Another attempt will be made on April 8, when the tides will be unusually high.

HARRY CHARLESWORTH
Secretary of the British Columbia Teachers' Federation

BUOYANCY MARKS DAY'S STOCK DEALS

Number of Issues Rise in Price in Trading at New York

STRENGTH SCENE IN TORONTO MARKET

Toronto, April 2.—Early losses were recovered on the Toronto Stock Exchange to-day, although persistently tight money, with call loans at twenty per cent all day, reduced the day's turnover to below 4,000,000 shares.

Among the high-priced issues, Commercial Solvents sold up \$26.25 to a record price at \$28.35 and Adams Express \$34 to \$34.25. Oil shares were heavily accumulated, providing the backbone of the advance. Indian Refining mounted \$53.75 to \$49.87, a new high, and Houston, Shelly and Standards of New Jersey and California mounted \$3 and more.

LINDBERGH FLIES TO MEXICO CITY

Mexico City, April 2.—Colonel Charles A. Lindbergh landed at the Valbuena Flying Field here at 1:55 p.m. for a two-day visit here. He flew from Brownsville, Texas.

Three Men Arrested When Big Narcotic Seizure Is Made

San Francisco, April 2.—A seizure of narcotics valued at \$500,000 was made here last night by federal agents, who arrested three men and held them on charges of violating the narcotics law.

Harry B. Williamson, chief of the federal narcotics detail in this district, participated in the raid and said the Arnold Rothstein gang in the eastern United States was involved, but he failed to amplify the statement.

The men under arrest are Mario Balisteri, Phillip Chon and Joseph Ricci. They all gave San Francisco addresses.

SATISFIED WITH HOTEL CONTRACT

"We are right up to schedule, and I am well satisfied with the progress made on the contract," said J. E. Buerk, vice-president of Carter-Halls-Aldinger Co. Ltd., general contractors for the new north wing of the Empress Hotel, following his arrival in the city to-day from Vancouver.

Steel is now rising rapidly, having reached the second story. Delivery of steel by the Dominion Bridge Company is being made steadily.

LINER FORGING AT FULL SPEED TO AID TAGORE

Hindu Philosopher Wants to Gain His "Land Legs" Before Addressing Conference

R.M.S. Empress of Asia Being Extended to Reach Victoria on Friday Evening

Will Tagore arrive in time? That is the question now exercising the minds of many of those interested in the Fourth National Conference on Education which will open its sessions in Victoria on Friday.

Sir Rabindranath Tagore, the noted Indian philosopher, is one of the most outstanding of the numerous prominent delegates to the conference and his literary contribution to the conference, "A Philosophy of Love," is expected to overshadow everything else from the angle of mysticism.

If Tagore is temperamentally inclined his divinations may "lack" force and finesse, so, in the opinion of the conference authorities, it is essential that the Indian philosopher be given an opportunity to get his "land legs" before he is called upon to speak.

Consequently the aid of the C.P.R. has been invoked and an effort will be spared to get the Hindu poet here in plenty of time.

DELAY FORESTALLED
Such a contingency was anticipated by Lord J. Nevill, organizing secretary, who lost no time in communicating with E. W. Beatty, K.C., president of the Canadian Pacific Railway, with the request that the liner Empress of Asia, on which Tagore is a passenger, be speeded up on her trans-Pacific voyage.

Desirous of assisting in any possible way, the C.P.R. president made it known that Capt. A. J. Halley, commander of the liner, had been instructed on case to:

WUHAN MEN IN RETREAT

Chinese Nationalist Troops Now Advancing on City of Hankow

Shanghai, April 2.—The headquarters of General Chiang Kai-shek, Nationalist China's President, at Kiukiang issued a statement that Government troops yesterday had taken Hwangchow, thirty-five miles east of Hankow from the Wuhan opposition, and were advancing upon Hankow itself, capturing many prisoners.

Admiral Shen Chao-kwon reported Nationalist gunboats yesterday had started a bombardment of enemy positions at Yangtze, much nearer Hankow. It was said the squadron would advance to Hankow to cut off the retreat of the Wuhan adherents across the Yangtze.

The decision of the Cantonese generals to obey the Central Government and the peaceful election of Kwangsi troops from Kwangtung was regarded in Nationalist circles as a severe blow to the cause of the Kwangsi military clique.

BUILDINGS DESTROYED
Peking, April 2.—A fire reported here to-day from Sratow, Kwangtung, that brigands had captured southwest Fukien, where they destroyed the premises of the London Missionary Society.

FORMER GOVERNOR OF ONTARIO DUE HERE TOMORROW

Col. Henry Cavendish, former Lieutenant-Governor of Ontario, who will occupy the chair when Viscount Willingdon gives his inaugural address to the Conference on Education in the Royal Victoria Theatre Saturday evening, will be accompanied by his wife and two daughters.

He will be accompanied by his wife and two daughters.

JIMENEZ IS SCENE OF SHARP FIGHT

Mexican Army Leaders Say Rebels Hemmed in and Unable to Escape

Plane Believed Carrying Rebel Leader Away Pursued By Army Plane

Mexico City, April 2 1:05 p.m.—Bitter fighting between the federal troops and rebels for the possession of the city of Jimenez in Chihuahua State was reported in a Government bulletin this afternoon to be proceeding again after an overnight lull.

The Government communication, dated at 1 p.m., stated the rebels had been hemmed in within a circle of federal fire from which they had been unable to escape.

HOLD SMALL AREAS
The rebels were stated to have made desperate but futile efforts this morning to break through the federal lines, which have the rebels bottled within the railroad station and other small position which they hold within a limited radius inside the town.

About 10:20 o'clock this morning, General Calles reported, one rebel plane was possibly carrying some rebel leader attempting to flee from the beleaguered city. A federal plane immediately started in pursuit.

Hearing Next Week In Case Of I'm Alone

New Orleans, La., April 2.—The preliminary hearing of the captain and crew of the sunken Canadian schooner "I'm Alone," charged with conspiracy to violate the prohibition law of the United States, was adjourned here to-day for one week on request of the Government attorneys.

Robber Loots Mail Bags of But One Letter

London, April 2.—The peculiar discrimination of the thief who opened a single sack of the steamship Leviathan's registered mail before it left here last week for New York is puzzling investigators.

The thief slit one of about 200 mail bags, reached through the slit to the smaller bag inside, slit that and took a single letter from Cologne, Germany, addressed to Bogota, Colombia. Nothing else was taken from the bag opened and other bags were not molested.

London police are trying, through the aid of German police, to ascertain the contents of the stolen letter. Where the theft was committed is still a mystery.

Chilliwack Chinese Victim Of Murderer

Chilliwack, April 2.—Lee Kay Tai, a Chinaman eighty years old, died in the Chilliwack Hospital this morning from injuries received in what is believed to have been an assault made on him by a person or persons at present unknown Sunday morning in Chinatown here.

The injured man was discovered later by Chinese children. Chief of Police Harding was notified and the injured man was brought to Chilliwack.

He had wounds about the head and face. Police are working on the case.

VANCOUVER GRAIN EXPORTS GROWING

Total This Crop Year Approximately 77,500,000 Bushels, States Report

Vancouver, April 2.—It is expected that before the middle of April the grain exports from Vancouver for the 1928-29 season will exceed the total of the season 1927-28, when 80,254,888 bushels were shipped, and 3,000,000 bushels remained in store. Till Monday morning, at a conservative estimate, exports from this port this season were 77,469,586 bushels. There are 5,945,968 bushels in the elevators and 3,979,000 bushels en route on the railways.

The ships in port to-day are booked to load 1,069,000 bushels. During March, 1929, the elevators loaded 12,770,565 bushels into ships, as compared with 9,769,294 bushels in March, 1928. The total exports at the end of March, 1928, were 36,334,086 bushels.

HEEDS ADVICE OF PHYSICIANS TO SAVE STRENGTH

MARSHAL JOFFRE

Paris, April 2.—Physicians told Marshal Joffre to-day his health was poor, but he must go carefully. The aged military leader sought their advice because of fatigue in the days after the funeral of the late Marshal Foch. Reports of Marshal Joffre's illness circulated in Paris to-day, but visitors found him at his desk writing. He is unable to walk about much because of water on the knee, gripping out of a fall last year.

VANCOUVER IS TO VOTE ON AIRPORT

Vancouver, April 2.—The Vancouver city council at a special meeting this forenoon approved a recommendation of the airport committee that a by-law for \$300,000 for purchase of a permanent airport site on Sea Island be submitted to the city taxpayers this summer.

CHARGE FOLLOWS CRASH OF AUTO

Five Young Persons Injured When Car in Vancouver Hits Telephone Pole

Vancouver, April 2.—A sixteen-year-old boy lost control of a rented automobile at Robson and Beatty Streets, West Third Avenue, suffering from fractures of the skull and both legs and reported in a serious condition in a hospital, Kailchenri Bodonock, seventeen, Cambie Street, cuts on the head, Kathleen Butler, sixteen, West Broadway, cuts on the face, William McDonald and Roy Tram, Robson Street.

The driver, Charles Tram, Robson Street, who escaped injury, was charged with furious driving. Passersby went to the assistance of the victims, some of whom climbed out of the wrecked car, and they were taken to a hospital. McDonald and Roy Tram were later allowed to go to their homes.

From all sections of the province came reports telling of widespread destruction and the crippling of communications by the storm yesterday, but while minor injuries resulted from flying debris, no loss of life was recorded.

BUILDINGS BLOWN DOWN
Following hard on the heels of a sleet storm which had caused serious dislocation of electric facilities, the gale, in places reaching a velocity of sixty miles an hour or more, raged yesterday.

No Trace Yet Found of Southern Cross Aviators In Northwestern Australia

Aeroplanes, Launches and Native Runners Join in Search for Kingsford-Smith, Ulm and Their Two Sydney-England Flight Companions.

London, April 2.—A dispatch to The London Evening News from Melbourne, Australia, to-day said anxiety for Captain Charles Kingsford-Smith, Lieut. C. T. Ulm and their two companions of the monoplane Southern Cross was acute.

Reports that they had landed safely near the Drysdale Mission station could not be confirmed and fears were expressed that the airmen, before sending out their final radio message, may have lost their way and headed toward Darwin, northwest of Wyndham, where the heavy rain would have made a safe landing almost impossible.

A dispatch to The London Daily Express from Sydney to-day said it was feared the men were lost in a wild inaccessible jungle country without food.

Colonel Brinsmead, Australian controller of civil aviation, who believes Port George was the probable landing place, is reported in the dispatch to The London Evening News as saying the country there is very rough and as bad as anything in the whole of Australia, with very few settlers in the district.

FOLLOWED WRONG ROUTE
The dispatch says a rescue plane which was sent yesterday took the wrong route and was almost certain to miss the lost airmen, who disappeared while en route from Sydney to Wyndham, on the northern coast of Western Australia, on the first leg of a flight to England.

A launch with provisions and fuel and repairing equipment for the plane left Wyndham by way of the Yurac River in the direction of the Drysdale Mission last night. Native runners were dispatched in the direction of the mission.

SEARCH IS EXTENSIVE
Sydney, Aus., April 2.—Search was being made to-day by air and train for the Northwestern Australian bush for the missing monoplane Southern Cross, and the four men it carried. Absence of word from Captain Charles Kingsford-Smith, Charles T. Ulm and their two companions, who radioed Sunday they were coming down in a rainstorm 100 miles east of Wyndham, on the northern coast of Western Australia, led to anxiety.

LAUNCH CRUISES RIVER
An Australian Airways plane chartered by a newspaper arrived at Wyndham at noon to-day on a reconnoitering trip. A launch went up the Drysdale River with gasoline and stores.

There was considerable difference of opinion as to where to look for the aviators, who were on the first leg of a flight from Sydney to England. There was a feeling, however, they had been forced down either near the Drysdale Mission station or at the Port George Mission on the Prince Regent River. The latter place is 130 miles east of Derby, Western Australia.

Both regions are inhabited for the most part only by natives, many of whom are unfriendly and reputedly cannibalistic, although in the Drysdale area the Indians are said to be more amicable toward white men.

It is believed the radio of the plane landed. Such is the nature of the terrain and the bush that it was regarded as unlikely a plane would be able to get up again after a forced landing.

FLANS UPSET
When the plane carrying the four men left Sydney last Saturday it was the fliers' intention to make Wyndham their first stop. The stages of the flight from there were to be Singapore, Karachi, Bagdad, Rome and Cremona.

The Southern Cross is the trimotored monoplane in which Kingsford-Smith, Ulm and two companions flew last year from California to Australia.

ROBERT ROWAN IS SENTENCED

Ordered to Serve Six Months For Unlawfully Selling Liquor

Arrested in Raid on Belleville Street on March 1; Constable Forged Charge

Robert Rowan, convicted on a charge of unlawfully selling liquor, was sentenced to six months imprisonment with hard labor by Magistrate George Jay in City Police Court this morning. According to a certificate of conviction entered through Chief of Police Fry, it was the accused's second offence.

A raid on Belleville Street premises, on the south side, between Government and Douglas Streets, resulted in the arrest of the accused on March 1. Chief Fry and Constables Strong, Bone Callan and Mercer took part in the raid, according to the evidence.

Constable Strong testified that he and Constable Bone went to the front door of the premises from a car driven by Constable Mercer. He had seen Constable Bone get a package from the running board of a car near the house after the accused had come round the side of the premises, he said. Previously Constable Bone had been supplied with banknotes, the numbers of which had been taken by the police.

BEER PARLORS MAKE PROBLEM

Disturbances on Street Cars Follow Closing, Magistrate Is Told

Thirty Days For Man Intoxicated on Car; B.C.E.R. Wants Nuisance Stopped

Creating of disturbances in Esquimalt street cars following the closing of the beer parlors on Saturday night has caused the B.C. Electric Railway to put an extra man in their cars at this hour, the court was informed when William F. Allen appeared in Esquimalt Police Court this morning to face a charge of being intoxicated in a public place.

Allen pleaded guilty and was sentenced to thirty days hard labor, it being the third conviction against him. Atwell D. King, counsel for the railway company, told the court that Allen had been arrested Saturday night when he entered a car at Admiral's Road and rode through the city and back to the terminus. He had been expecting in the car and in other ways making it disagreeable. This sort of thing had been going on nearly every Saturday after the closing of the beer parlors. Mr. King added, stating the company had put on a special man about 11 p.m. to handle the situation. He asked that an example be made as a deterrent to others.

REPAIRS MADE AFTER STORM

Fair in Ontario To-day; Deaths in Storms in U.S. Yesterday

Toronto, April 2.—Ontario, swept yesterday practically from end to end by the worst gale experienced in many years, to-day took an inventory of property damage estimated to exceed \$1,000,000.

To-day fair weather and higher temperatures prevailed throughout the province. Telegraph and telephone communications had been restored in many districts this morning and it was expected industries in many cities and towns where electric power was cut off yesterday would be able to resume operations to-day. All available linemen are working at high pressure, replacing lines and poles snapped either through the weight of sleet and ice or through the force of the gale.

From all sections of the province came reports telling of widespread destruction and the crippling of communications by the storm yesterday, but while minor injuries resulted from flying debris, no loss of life was recorded.

BUILDINGS BLOWN DOWN
Following hard on the heels of a sleet storm which had caused serious dislocation of electric facilities, the gale, in places reaching a velocity of sixty miles an hour or more, raged yesterday.

\$32,000 FIRE IN ATLIN B.C.

Government Liquor Store, Masonic Hall and Other Building Swept By Flames

Atlin, B.C., April 2.—Losses totaling \$32,000 were caused by fire here yesterday morning. The loss was divided as follows: Masonic Hall Building, \$10,000; Government liquor store and stock, \$10,000; Sands, men's furnishings, building and stock, \$10,000; Kinkaid Hotel, \$1,000; small buildings, \$1,000.

The fire broke out in the rear of the Government liquor store. It was accompanied by a thirty-mile-an-hour wind which blew flaming embers for a distance of half a mile. Well-organized volunteers put many small fires started by the embers.

Nothing was saved from the liquor store and very little from the Sands men's furnishings store.

Rexall One Cent Sale

It is a sale where you buy two articles for the price of one plus the one cent. Every article in this sale is a high class standard piece of merchandise, just the same as it is sold every day at the regular price.

ONTARIO'S MINERAL OUTPUT DOUBLED

Ontario is the chief mineral-producing province of the Dominion. Ontario's annual mineral output has doubled in value in the last fifteen years, and in no part of the world is there today more intense interest in the search for, and development of, mining properties.

ALBANY RIVER ONTARIO

A recent report of the Geographic Board of Canada states that the Albany River, rising in Lake St. Joseph and flowing into James Bay, Ontario, was named by the Hudson's Bay Company in 1683 after James, Duke of York and Albany (1633-1701), later King James II.

"BEATS CAPONE TO DRAW"

"Scarface Al" Capone, Chicago gang chieftain, is seldom photographed as he usually covers his face with the approach of a cameraman, but a fast-working photographer for NEA Service, beat Capone "to the draw" in the above picture. Notice Capone's hand moving upward in his attempt to cover his face when he saw the camera as he was conferring with his attorney, Benjamin Epstein (left), in the Chicago federal building. Below is Capone (indicated by the arrow), leaving the federal building after being questioned by the U.S. officials. Notice that his alert bodyguards have their hands deep in their coat pockets—maybe they have them there just to keep warm, and maybe not.

Sure relief from Stomach Pains, Gas, Dizziness

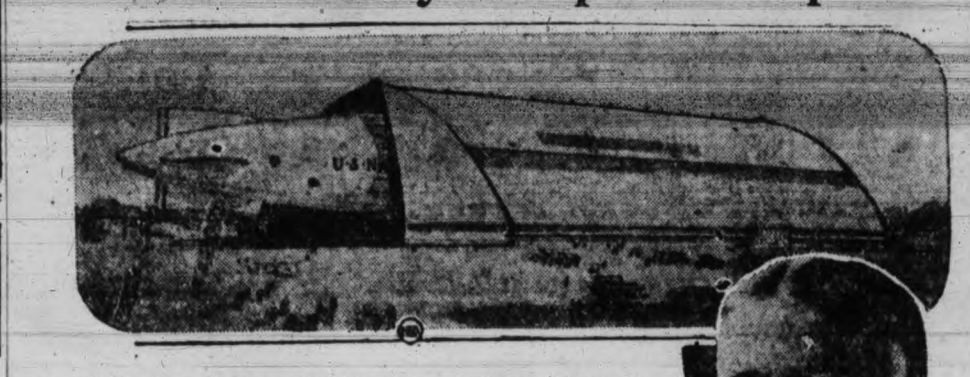

Sure relief means sure relief, when you take Tanlac for indigestion, bloating pains in stomach and bowels, Sour Stomach, Gas, Headaches, Dizzy Spells. Every bottle of Tanlac is guaranteed to help you. If it doesn't, your money will be refunded. The first bottle will help you. Often the first few doses give such welcome relief that you know Tanlac is the medicine that will restore you to health.

As Mr. Fred Hill, 349 Thames St., London, Ont., writes: "I have never thought anything could do me what Tanlac did. I had you."

TANLAC

52 MILLION BOTTLES USED

World's Largest One-floor Building to House Navy's Super-airships

The artist's drawing shows how the huge airship factory and dock at Akron will look when completed. The plan is W. C. State, chief engineer of the project.

AKRON, O., April 2.—When the Goodyear-Zeppelin Corporation here gained the navy's contract to build its two 6,500-cubic-foot helium airships, the largest in the world, it also undertook one of the most difficult engineering problems in building construction.

For a building has to be put up that will permit the construction of each of these huge Zeppelins entirely within its confines. That means a building without a single obstructing pillar, yet so wide and so long that it will cover an area of eight and one-half acres of level floor space.

"This structure, the biggest one-floor building in the world, has already been begun on the municipal air-field of Akron. It was designed by Wilbur Watson and Associates of Cleveland, O. under the direction of Dr. Karl Arntsen, chief engineer of the Goodyear-Zeppelin Corporation. The construction of the airship factory and dock is under the direction of W. C. State, consulting engineer of the Goodyear Tire and Rubber Company.

length of the structure will carry the materials to their places. The construction of the massive arches, 325 feet from base to base, will be another difficult engineering feat. Each will be erected in three sections, and set up by means of powerful locomotive cranes and specially designed lifting tackle.

Another problem before the engineers has been the support and operation of the orange-peel doors at the ends. The problem was to provide doors that would permit ingress and egress of the huge airship with ample clearance, to be operated safely and with reasonable speed.

That meant a clearance of at least 180 feet in height and 240 feet wide at the bottom, the opening being in the shape of a parabola. It meant, also, the construction of doors, each segment or leaf of which would weigh 800 tons, rolling back and forth on a circular track having a radius of about 200 feet.

So massive will these doors be that each hinge which will hold a segment to the top of the main structure will weigh three and one-half tons. The segments will swing back over the sides of the building on heavy four-wheeled trucks below and supported by the massive hinges at the top.

The mechanism moving the doors will be operated by four 125-horsepower motors.

Completion is expected to be half completed by midsummer, when preliminary tests of the structure will be made and the work rushed to completion before assembling the first of the 6,500-cubic-foot ships is started.

DWARF OTHER SHIPS

The ZRS-4, first of the navy's helium ships to be built here, far exceeds the Los Angeles and even the Graf Zeppelin in size, power and range. Its 6,500-cubic-foot-of-volume covers an area 765 feet long by 133 feet in diameter. Addition of the cabin and engines below bring its overall height to 146.5 feet.

To build and house this immense ship, a steel building 1,175 feet long, 325 feet wide and 205 feet high has been designed. The entire capitol at Washington, except part of its spire, would be obscured by this structure, both the Woolworth building and the Washington monument could lie lengthwise in it, or fourteen football games could be played on its floor at the same time, with plenty of room to spare.

So immense is this building that its design presented unique problems to the engineers. Besides the most difficult of all was the determination of its shape so that it would offer the least practicable disturbance of air currents. The ordinary rectangular box type of hangar would raise eddy currents at the entrance that would interfere with getting the ship in and out.

ADOPT EGG-SHAPE

The problem was solved by shaping the building like an egg-out in two the long way. In technical language this is called a semi-ellipsoid.

The solution of this problem, however, created another one almost as difficult. That was the shaping of doors to conform with that of the building. These, instead of being the straight type of doors, will be like large range doors rolling over the entrance on heavy steel wheels. Each of the two doors will resemble the skin of one-quarter of an orange. Again referring to technical terms, the doors are quadrants of a hollow sphere.

Such a huge structure, built entirely of steel, changes its shape constantly with the varying temperature and wind pressure. As the air becomes warmer, its length will increase by as much as a foot and the tops of its arches will rise by as much as half a foot. In winter, the building will contract to the same extent. Under varying wind pressure, the building will shift by as much as a foot either way from the centre line at the top.

To accommodate this shifting and variation in size, the building will rest on solid steel rollers so that it may expand and contract freely, while its arches will be hinged at the bottom and at the top to give freely under the pressure of the wind.

The huge steel arches, each weighing 160 tons, will be supported on concrete footings, or "piers," which rest on concrete piles driven to bed rock about thirty feet below the ground. They will be built eighty feet apart and will support all the cat-walks and platforms needed to accommodate the workmen in their construction of the airship. Stairs and elevators up the sides of the building will provide access to the various stages and platforms, while trolley beams along the

top of the structure will carry the materials to their places.

Another problem before the engineers has been the support and operation of the orange-peel doors at the ends. The problem was to provide doors that would permit ingress and egress of the huge airship with ample clearance, to be operated safely and with reasonable speed.

That meant a clearance of at least 180 feet in height and 240 feet wide at the bottom, the opening being in the shape of a parabola. It meant, also, the construction of doors, each segment or leaf of which would weigh 800 tons, rolling back and forth on a circular track having a radius of about 200 feet.

So massive will these doors be that each hinge which will hold a segment to the top of the main structure will weigh three and one-half tons. The segments will swing back over the sides of the building on heavy four-wheeled trucks below and supported by the massive hinges at the top.

The mechanism moving the doors will be operated by four 125-horsepower motors.

Completion is expected to be half completed by midsummer, when preliminary tests of the structure will be made and the work rushed to completion before assembling the first of the 6,500-cubic-foot ships is started.

To build and house this immense ship, a steel building 1,175 feet long, 325 feet wide and 205 feet high has been designed. The entire capitol at Washington, except part of its spire, would be obscured by this structure, both the Woolworth building and the Washington monument could lie lengthwise in it, or fourteen football games could be played on its floor at the same time, with plenty of room to spare.

So immense is this building that its design presented unique problems to the engineers. Besides the most difficult of all was the determination of its shape so that it would offer the least practicable disturbance of air currents. The ordinary rectangular box type of hangar would raise eddy currents at the entrance that would interfere with getting the ship in and out.

ADOPT EGG-SHAPE

The problem was solved by shaping the building like an egg-out in two the long way. In technical language this is called a semi-ellipsoid.

The solution of this problem, however, created another one almost as difficult. That was the shaping of doors to conform with that of the building. These, instead of being the straight type of doors, will be like large range doors rolling over the entrance on heavy steel wheels. Each of the two doors will resemble the skin of one-quarter of an orange. Again referring to technical terms, the doors are quadrants of a hollow sphere.

Such a huge structure, built entirely of steel, changes its shape constantly with the varying temperature and wind pressure. As the air becomes warmer, its length will increase by as much as a foot and the tops of its arches will rise by as much as half a foot. In winter, the building will contract to the same extent. Under varying wind pressure, the building will shift by as much as a foot either way from the centre line at the top.

To accommodate this shifting and variation in size, the building will rest on solid steel rollers so that it may expand and contract freely, while its arches will be hinged at the bottom and at the top to give freely under the pressure of the wind.

The huge steel arches, each weighing 160 tons, will be supported on concrete footings, or "piers," which rest on concrete piles driven to bed rock about thirty feet below the ground. They will be built eighty feet apart and will support all the cat-walks and platforms needed to accommodate the workmen in their construction of the airship. Stairs and elevators up the sides of the building will provide access to the various stages and platforms, while trolley beams along the

top of the structure will carry the materials to their places.

MEXICO WAR BOMBING HAS ECHO IN U.S.

Ohio Man in Naco, Arizona, Wounded by Fragments Off Rebel Fliers' Bomb

Naco, Ariz., April 2.—Fairy Baker, thirty-five, of Alliance, O., was wounded in the head by flying fragments of one or two rebel bombs which fell on the United States side of the international line here early today during an air raid by a Mexican rebel aviator on the federal fortifications across the border in Naco, Sonora.

Baker was immediately placed under treatment by a physician at the United States immigration office, but the extent of his injuries was not disclosed. There was also an unverified report that a boy had been hurt during the attack, but he had not been located in the confusion which followed.

WINDOWS BROKEN

Four missiles were hurled, one of which shattered every window in the business section of Naco, Ariz., sending terror-stricken populace in a hurried scramble from the danger zone. The other two bombs fell across the line. The extent of their damage was undetermined.

Major Charles B. Haxell, in charge of the United States troops here, declined to comment on the situation.

LEADERS TO ACT

Washington, April 2.—Dropping of bombs in Naco, Arizona, today by a Mexican rebel flier is expected to result in additional precautions being taken by the United States Government to prevent repetition of such an incident.

The State Department, in the absence of any official report of the bombing, indicated Maj. General William Lassiter, commander of the Eighth Corps area of the army at San Antonio, would promptly take steps, probably ordering some units of the army air corps from one of the Texas airfields to Naco.

ON THE ALERT

General Lassiter has full authority to take such steps as he considers advisable. Should planes be ordered to the border they will be given instructions to prevent the incursion of any rebel air craft over United States territory.

Today's bombing was not the first that had disturbed Naco. Last Sunday a rebel plane dropped two bombs in the Mexican town across the border and later returned and dropped five more. Fragments from some of the bombs flew to the United States side and struck the railroad station at Naco.

REPAIRS MADE AFTER STORM

(Continued from page 1)

many wooden structures including the Canadian-Henley Regatta grandstand at Port Haulhouse and a large dance hall at Port Dover and Lashed Lake Ontario into a fury, water covering shore properties in many localities.

TREES UPROOTED

Reports indicated the tempest wreaked most havoc on the Niagara Peninsula, extensive damage being done in agricultural areas and in Port Colborne. Trees were uprooted, roofs torn off and fences levelled all over the fruit belt.

Along Lake Erie the surge also was extensive. Tugs of the Port Dover fishing fleet, caught in big seas as the gale blew, staged a heroic battle with wind and waves in order to make port, watched by townfolk who lined the shore.

WHARVES DAMAGED

Thousands of dollars of damage was done to wharves at various points on Lakes Ontario and Erie, at Port Dover alone the loss being estimated at \$75,000.

In the east end of Toronto the water broke over restraining walls flooding cellars and roadways.

A blizzard in Northern Ontario caused disturbance of railway schedules and disruption of telephone and telegraph services.

North Bay, Ont., April 2.—While the North Bay district experienced one of the worst snowstorms of the season yesterday, no property damage was occasioned. South of here as far as Altondale, a score or more of telephone poles were down and service interrupted.

In the Capreol and Hornepayne areas the snow was swirled before a high wind, accompanied by below-zero weather.

MISSISSIPPI RISES

Chicago, April 2.—Property damage mounting into millions and a new flood threat remained today in the Midwest as the rain, wind and snow storm that swept over the region Sunday and yesterday. Heavy rains in the central and blizzards in the northern states had again swollen nearly all streams and the danger was considered acute as the tributaries brought this added burden to the Mississippi, which was already nearing the top of its levees.

The property damage in Chicago alone was estimated at \$1,000,000. The waves swept over the outer drive in Lincoln Park and made it necessary to close that thoroughfare.

DEATHS IN U.S.

New York, April 2.—A death toll of ten injuries to more than two-score persons and widespread property damage was caused by a furious wind storm that swept across thirteen states and part of Canada yesterday.

The storm, which reached a velocity estimated at more than seventy miles an hour as it touched various places in the East, originated in the southwest, tearing across parts of Arkansas, Missouri, Nebraska, Iowa, Illinois, Minnesota, Wisconsin and Upper Michigan and then across Ohio into

Indiana.

Two Spanish aviators, Captains Jose and Iglesias who left Rio de Janeiro this morning, landed in Mexico City at 1:45 this afternoon.

Both the code signals and voice are transmitted only one way, from ground to plane, at present, but National Air Transport engineers claim a device is being perfected that will permit two-way communication.

NEW DIRECTIONAL SYSTEM FOR PLANES

Chicago, April 2.—A practical application of radio as a means of solving aviation's greatest difficulty, bad weather, has been made by the National Air Transport with the installation of a directional and ground-to-plane receiving sets in its planes.

Following tests of a year and a half, planes of the Cleveland-New York division have been equipped with the apparatus and installation of the directional and ground-to-plane receiving sets in its planes.

Two types of transmitters are used in controlling the course of the plane. To aid in keeping on a course, the pilot receives a signal beacon whose signals are concentrated in one direction by means of loop transmitters. Deviation from a plane's course will change the intensity of the signals.

On longer length the pilot receives hourly weather reports through voice transmitters.

CANADIAN-U.S. WHEAT ALLIANCE NOW SUGGESTED

Washington, April 2.—An alliance between Canadian wheat pools and United States wheat growers was suggested by J. W. Brinton of Lincoln, Neb., before the Senate Agriculture committee today, as a means of stabilizing the price of wheat. He said sixty per cent of the wheat of the world was grown in the two countries and that if they co-operated they would be able to control the price rather than have the world market to do so.

Pennsylvania, West Virginia, New York and New Jersey. Buildings were unroofed, trees uprooted and wires blown down in the gales that swooped down with increased velocity at a half-dozen scattered sections in the East.

In western Pennsylvania and West Virginia three children lost their lives as a result of the storm, and in Pittsburgh a dozen persons were hurt. Other deaths brought the total to ten.

TEACHERS OF B.C. DISCUSSING SCHOOLS' PROGRESS AND PLANS

(Continued from page 1)

SUPERANNUATION ACT

The recently-passed superannuation act for teachers was commented upon by Mr. Mitchell, Mr. Brooks and Mrs. E. Mahon, president of the Provincial Teachers' Federation, who also delivered an address of welcome. Mr. Mitchell gave much of the credit for the bill to Harry Charlesworth, the secretary of the Federation.

The chief educational speaker of the morning session was M. E. Laster, professor of psychology and education in the University of Alberta. His theme was "Is psychology determining our classroom practice?"

At the opening of the session, the several hundred teachers in attendance rose while Rev. A. E. Kerr pronounced the invocation. The chairman was W. W. Woodhead, president.

Pork Prices Rise

While Eggs Drop On Local Market

Retail Market

A one-cent rise in the wholesale price of pork and a two-cent reduction in the retail price of eggs featured the local markets yesterday. Hogs are now selling at the trade at 27, 27 and 28 cents per pound for rough, shoulder, loin and leg cuts respectively.

Although a carload of California lettuce arrived here yesterday, the price of the green is expected to go up shortly. Trading remains firm throughout the vegetable and fruit section of the market. Naval oranges are also expected to rise in price shortly.

The apple market has been narrowed down to two or three varieties, with Winesaps and Yellow Newtowns selling in the largest quantities.

STREET FIGHT AT JIMENEZ

Mexico City, April 2.—Held in check by stubborn rebel resistance after a heavy day of fighting, the federal forces today were poised for another onslaught on the insurgents' stronghold.

Contradicting federal reports of a partial victory in yesterday's battle, the rebels claimed a sweeping victory at Jimenez, during which insurgent forces drove southward for a distance of twenty miles.

IN RETREAT IN WEST

Along the west coast, the rebels were reported in full retreat after disastrous battle in which they were said to have lost 100 dead, fifty wounded and numerous prisoners.

For the first time since the outbreak of the revolt five weeks ago, the revolution appeared today to be on the verge of a decisive battle for Jimenez being the most extensive thus far reported.

For fourteen hours yesterday the Jimenez battle raged and late in the afternoon the federal forces first to draw their lines for resumption of the attack to-day.

At that time they claimed possession of part of Jimenez, with the rest of their three-mile battlefield appreciably nearer the important railroad point.

No definite estimate of the casualties was available, each side stating hundreds of the enemy had been killed.

Artillery, aeroplanes and machine guns were used extensively to support cavalry and infantry advances all along the line. About 10,000 federal and 5,000 rebels were reported to have participated.

Leut. Colonel Roberto Pizarro, noted Mexican flier, reached the federal lines after being shot down by rebel fire Sunday. He was given a new plane to take up a search for a companion still missing.

General Calles, announcing the attack would be renewed today, reported bridges north of Jimenez had been burned by federal detachments, cutting off any rebel retreat.

ECLIPSE OF SUN TO BE STUDIED

Astronomers Will Travel to
Siam and Philippines to Ob-
serve Phenomena May 9

Toronto, April 2 (Canadian Press).—Canada will not be represented among the scientists who are setting out for Sumatra, Siam and the Philippines to observe the total eclipse of the sun on May 9 and to test that part of the Einstein theory dealing with the deflection of light rays.

astro-physicists at the University of Toronto, told The Toronto Telegram neither he nor other scientists of the university had the leisure to travel during this time, and that various circumstances would prevent the astronomers of Ottawa and Victoria from making the trip to the East, the eclipse's path extending from the Indian Ocean to the Pacific.

He stated, however, that the field would be covered by parties from England, the United States, Germany, Holland and Australia, and that their combined observations and photographs would tend to prove or disprove the deflection of light rays shed from the stars, as predicted by Einstein in 1915.

TEST FOR THEORY

"Einstein," said Professor Chant, "deduced his theory of the deflection of light from his calculations proving that time and space are correlated. If was assumed time was fixed, that

space was fixed, and that the two had no affinity with one another. Einstein has shown—and this involves the extremely complicated theory of relativity—that both time and space are independent, co-related, and to prove his contention he stated in 1915 that light, which is intimately connected with the theory, is deflected when it comes within the influence of a larger body.

"Scientists are therefore taking the opportunity which the eclipse of the sun affords to put this prediction to the test. They will take photographs of the stars in the sun's field and photographs of the same field when the sun is not in it, and by this means any deflection will be recorded.

"The theory that when starlight passes near a large body like the sun its path is bent has already been tested and the results have proved favorable to the theory. But the bend is so slight, the measurements—which

have to be done under a microscope—are so difficult to obtain that constant observations have to be made to verify and substantiate the theory."

Professor Chant said he had, with Professor R. K. Young, associate professor of astronomy at the University of Toronto, taken photographs in Australia during the eclipse of the sun in 1922, and that the results tended to prove the deflection of light as maintained by Einstein.

The approaching eclipse on May 9 will last for five minutes and the path of the moon's shadow will start from the Indian Ocean and moving eastward across the north of Sumatra, the lower part of Siam, the north of the Malay Peninsula, the southern tip of Cambodia, will pass across the South China Sea and the middle of the Philippines to end in the Pacific Ocean.

During the five minutes scientists who have prepared stations along the

path where the eclipse will be best seen will record their observations.

OTHER STUDIES

In addition to the data which may prove or disprove Einstein's theory, scientists expect to find a clue to the constitution of atoms, and to observe the effect of the eclipse on radio signals. The eclipse will also make it possible to learn more details about the sun's chromosphere, or outer layer, and to measure the temperature and pressure of the various gases on the sun's corona.

LIVESTOCK HELD BY INDIANS

Holdings of farm livestock by Indians on reserves in Canada during 1928 were as follows: Horses, 36,172; milch cows, 9,194; other cattle, 34,495; sheep, 3,204; swine, 9,704; hens and chickens, 108,918; turkeys, 7,715; geese, 5,196; ducks, 7,788.

GRAIN ACT IS SOON TO BE DEBATED

Parliament Will Decide Mixing
and Other Trade Questions

Ottawa, April 2 (Canadian Press).—Observers of political affairs in the capital believe much will be heard in Parliament after Easter recess of the proposal that mixing in elevators in Canada of wheat intended for export shall be declared illegal. The demand has come from the prairies that the ultimate purchasers of Canada's wheat abroad should get it as it is graded when the farmer delivers it at the country elevator. Many of the prairie members who have already spoken in Parliament on this question, are firmly of the opinion the practice of mixing of grades now so prevalent should be stamped out.

The Government is expected to give an attentive ear to the protests from the prairies. "In my opinion," said Hon. C. A. Dunning, Minister of Railways, speaking in the House, "we will never get back to where the wheat of Western Canada will take its proper place in the markets of the world until we eliminate the mixing of the straight grades of grain."

Dissatisfaction is found on the prairies over the handling of the 1928 grain crop—the largest in the history of the Canadian prairies, amounting to more than 500,000,000 bushels. While there is difference of opinion among the members of Parliament from the wheat growing districts as to the extent of this discontent, there is unanimity that discontent exists. Some of the members have told Parliament the farmers are demanding action and that they believe the present Board of Grain Commissioners, which administers the Canada Grain Act, the legislation under which there is a certain control over the handling of the crop, should be dismissed. Other members did not go as far as that, but suggested a few changes in the act would meet the situation.

MIXING AND SKIMMING

The complaints the farmer members have made refer to grading, mixing and skimming, and the administration of the act. They claimed the wheat-growers lost millions of dollars because of the manner in which the wheat was marketed.

Grading has developed into a very complicated question for Parliament to deal with. Two years ago warnings came from Liverpool, and were frequently repeated, that Canadian wheat was not standing up to its grades. To use the words of one of the officials of the Canadian Department of Agriculture, this threat was a scar on the responsible for managing the marketing of the crop, so that on the arrival of the new wheat last fall the inspectors were instructed to "grade much harder."

STANDARDS BOARD

While the first three grades of Canadian wheat are fixed by the Canada Grain Act, much depends on how the act is interpreted. The grades below three, namely four, five, six and feed, are decided by the Grain Standards Board, which meets early each crop year and fixes the standards, having received samples from various parts of the country. This board met in October last, but much grain had already been graded. Five nights of frost in August had caused considerable damage to grain and there was general disappointment among the farmers over the grades they were getting. It was contended much of the frozen grain only suffered "bran frost," which did no real damage to the milling quality.

The Standards Board found the grading was too severe and ordered it reduced somewhat. However, it was still high and evidence before the agricultural committee of the House of Commons already taken indicates the Canadian wheat was a full grade higher reaching Liverpool than heretofore. The British millers found they were getting as good a grade certified as No. 4 as they used to get marked No. 3, and so on. It took the British buyers, until about the middle of November to appreciate this. Then, according to the farmer members of Parliament, the spreads in prices between the grades began to shrink. However in the meantime half of the wheat in Canada had passed out of the hands of the farmers and they did not therefore reap the advantages of this change in spreads. This cost the wheat growers "tens of millions of dollars," one member asserted in discussing this point in the House of Commons recently.

DEBATE IN COMMONS

The mixing has already come in for much condemnation on the floor of Parliament. It was claimed, buyers would go through the trains of wheat at the various large stations of the prairies and pick out the cars in which the wheat was much above the minimum of its grade. These would be diverted to their elevators and mixed with inferior wheat until it was just over the minimum standard. It would then be exported. The farmer would not get any extra because his original wheat was above the minimum. It is claimed this works to the disadvantage of the producers in that the British buyers in the long run pay for what they get and mixing down to just above the minimum eventually lowers prices. The advantage goes to the company which is able to buy No. 4 wheat and sell it as No. 3 and so on. There is no doubt, however, that mixing will find strong supporters before the session is over so a spirited discussion may be expected.

The chief objection about the administration of the Grain Act for which the grain commissioners are blamed by certain farmer members—is the "hybrid" or "high-powered" ticket as it has been termed. The complaint is that this ticket, given when a Pool farmer put his wheat into a line company elevator for special binning, took away from the farmer the right to designate that his wheat must go to a pool terminal elevator, with the result that he would lose the two cents a bushel "bonus" from the Pool given to its members who use its terminals. It was provided in the act that the farmer should have the right to designate such terminal elevators.

CHANGES EXPECTED

Thomas F. Donnelly, Liberal-Progressive, Willow Bunch, Saskatchewan, speaking in the House of Commons stated: "I fully agree with those who say the Western farmer is expecting some redress from the wrongs from which he is suffering at the present time. The whole problem is a serious one to Western Canada. The Western farmer's bread and butter, his livelihood, depends on the proper solution

Angus Campbell & Co. Ltd.

25 Dozen Women's All Pure Wool Vests At 95c

25 dozen women's fine quality all pure wool Vests, made with short sleeves, strap shoulder or opera top. Guaranteed unshrinkable. Very special value at95c

Back-hooking Brassieres, Excellent Value At 45c

Back-hooking Brassieres, of strong pink novelty material with elastic at sides, splendid fitting; sizes 32 to 42. Wednesday morning45c

A Special Offering of Good-fitting Corsettes at \$1.25

Corsettes of strong rayon silk stripe batiste, boned below waist at front, elastic over hips and finished with four strong hose supporters; sizes 32 to 40. Special at\$1.25

Rayon Silk Nightgowns, \$1.95

Good quality Rayon Silk Nightgowns, lace trimmed in three very dainty styles, in all the wanted pastel colorings. Excellent value at\$1.95

Lace-trimmed Rayon Silk Slips, \$1.75

Rayon Silk Costume Slips, trimmed with dainty tinted lace at top and bottom; sizes up to 42. In shades of sunni, peach and cream. Unusual value at\$1.75

Imported Sea Island Cotton Hose For Women, Per Pair, 90c

An excellent hose for present wear. Good fitting and a good wearing quality. In black, white, sand and pearl; sizes 8½ to 10. Excellent value at, per pair90c

ELECTION TRIALS

Edmonton, April 2.—Facing charges of forgery and false pretences arising out of the Athabasca election offences of 1925, six persons are to appear before a magistrate at St. Paul on Thursday of this week. Summonses have been served by Sergeant Warrior of the R.C.M.P. As a result of these fresh cases, the number of persons against whom action has been taken by the Federal Government in this latest drive now amounts to nine.

SUICIDE IN NOVA SCOTIA

Halifax, April 2.—The body of A. Marsden, thirty-five, a native of Great Britain, was found on the Goresbrook Golf Club grounds yesterday. There was a bullet wound in the head and a stockless 22 rifle nearby. An investigation at his boarding house revealed an undated letter bearing his signature and declaring his intention to commit suicide as a result of being penniless and in ill-health. Little is known here regarding Marsden, apart from information contained in the letter, which said he had lived in Winnipeg and Vancouver during his thirty years' residence in Canada.

WORKMAN LOSES LIFE

Winnipeg, April 2.—Knocked from a ladder when it was struck by a truck in a garage doorway, Walter Preston, young electrician, was fatally injured here yesterday.

Gained 10 Pounds In 22 Days

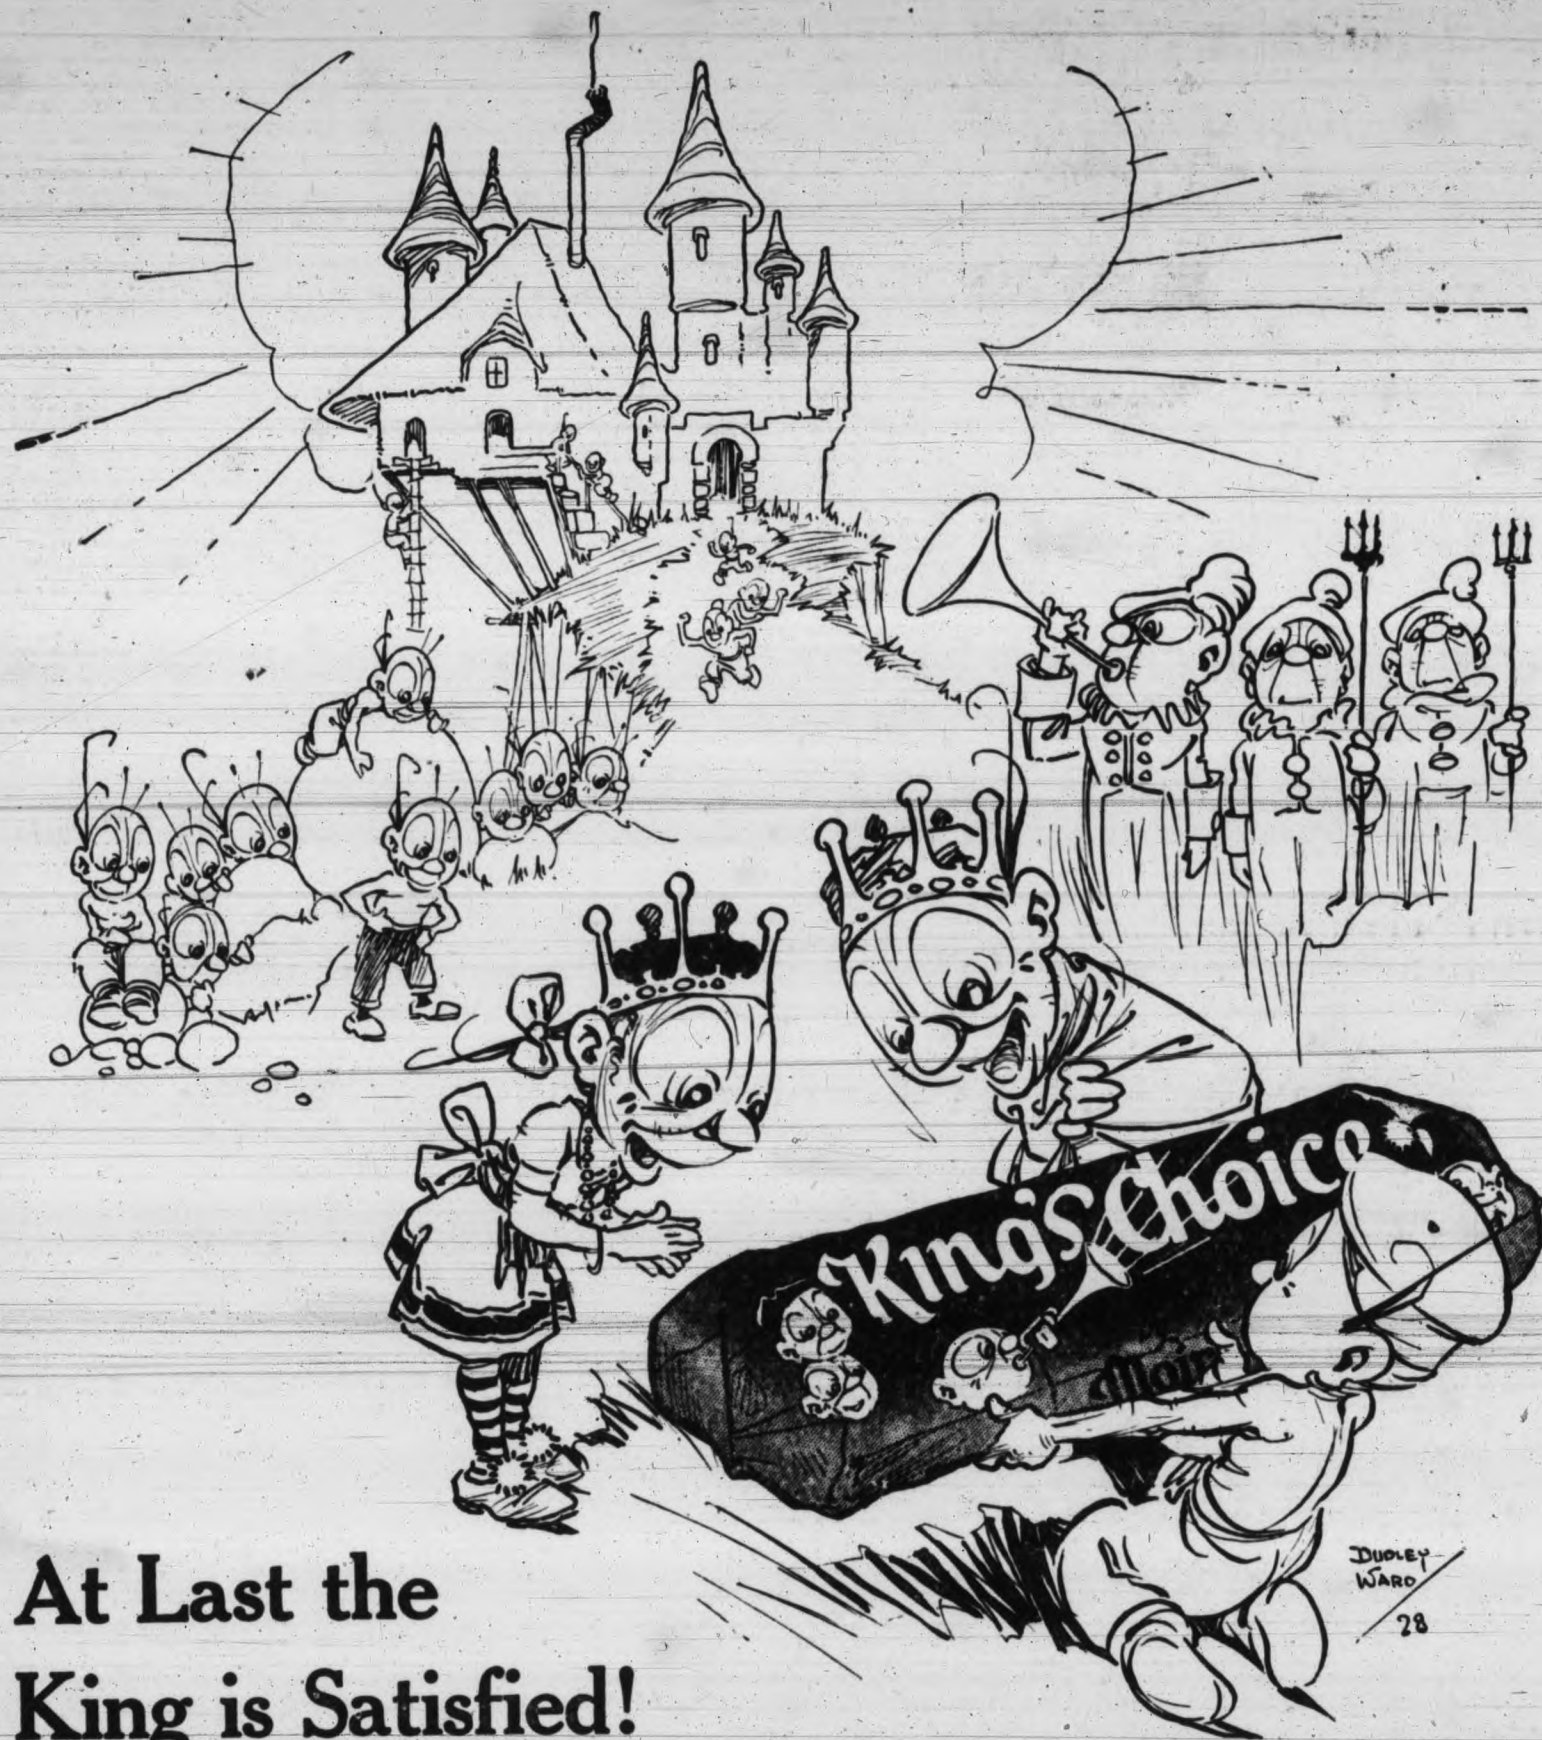

That's going some—but skinny men, women and children just can't help putting on good healthy flesh when they take McCoy's Cod Liver Extract Tablets.

CONFERENCE PROGRAMME IS ISSUED

Inaugural Sessions Will Be Held on Friday Next in Royal Victoria Theatre

The Victoria programme of the Conference on Education, as announced by Major Fred J. Ney, executive secretary, is as follows:

FRIDAY

1230 to 130 p.m., Royal Victoria Theatre: lunch hour programme of short films—(a) "The Making of a Book"; (b) "The Native Animals of Australia"; (c) "The History of Electricity"; (d) "The Tyneside Industries."

230 p.m., Royal Victoria Theatre: chairman, the Mayor of Victoria. Exhibition of a film, provided through the courtesy of the Imperial Government of Japan, illustrating the physical training of Japanese girls. "Education for Health," Robert Jarman, director of physical training to the city of Leeds.

Mr. Jarman's lecture will be illustrated by groups of boys and girls, specially selected from the schools of Victoria, who will give displays of physical training and folk-dancing. This lecture will have a special message for all parents of children.

815 p.m., Royal Victoria Theatre: chairman, Dr. L. S. Killick—The Canadian Singers will give a short programme from their repertoire of Tudor folk-songs and madrigals. These performers have won for themselves a well-deserved place in the music-loving world.

"Education in India," Rushbrook Williams. This lecture will be illustrated by a number of photographs of Indian educational establishments.

945 p.m., Parliament Buildings—Reception by the Government of British Columbia to conference delegates and members.

SATURDAY

1230 p.m., Empress Hotel—Luncheon tendered by the Government of British Columbia to the visiting delegates to the conference.

815 p.m., Royal Victoria Theatre: chairman, Hon. Henry Cockshutt—Inaugural address, His Excellency Viscount Willingdon, Governor-General of Canada.

"A Philosophy of Love," Sir Rabindra Nath Tagore.

SUNDAY

11 a.m., Christ Church Cathedral—Special conference service; speaker, Ernest Raymond.

Salt Spring

Mrs. Young arrived at Ganges on Thursday from Vancouver and will join the staff of the Lady Minto Hospital, Ganges.

Kenneth Ashton came over from Vancouver on Thursday on the S.S. Chairman to spend the Easter holidays with his mother, Mrs. T. Ashton, Ganges.

Miss Doris Taylor of Victoria spent Easter on Salt Spring, the guest of Captain and Mrs. V. C. Best, "The Alders," Ganges.

Gerald Jackson, who has been a patient for more than a week at the Lady Minto Hospital, Ganges, as a result of an accident, has recovered sufficiently to be able to return to his home at Fulford Harbor.

Miss E. Thornton, who has resigned her position as matron at the Lady Minto Hospital, left Ganges on Friday for her home at Deep Cove.

A. W. Drake, who has been paying a visit to friends in Vancouver, has returned to his home at Ganges.

Mr. and Mrs. Landry of Musgrave Mountain, South Salt Spring Island, are receiving congratulations on the birth of a daughter at the Lady Minto Hospital, Ganges, on Saturday, March 30.

Miss Betty Durnell of Victoria is a visitor to Ganges, where she is staying with friends.

The pretty little church of St. Paul's, Ganges, was beautifully decorated with lilies for the Easter services by ladies of St. Paul's Altar Guild.

A mixed hockey team came over on Saturday from Duncan to meet a mixed team at Ganges, where a splendid game resulted in a win for the Ganges boys and girls, 7-2.

The Coyne Comedy Company, from Victoria, paid a visit to Salt Spring Island this week, playing to a crowded audience at the Infirmary Hall, Fulford. Their entertaining performance met with great enthusiasm.

Mr. and Mrs. J. C. Pease of Fulford Harbor are visiting friends in Vancouver for a week or so.

Mr. and Mrs. A. Davis entertained a few of their friends to dinner at their home, "Bathmore," on Friday evening. Among the guests were Miss Eleanor Gropp, Miss Edna Morris, Laurie Peterson and Harold Bradley.

Among the guests registered this week at Harbor House were A. C. Foreman, Vancouver; J. C. Terry, Victoria; J. R. Mitchell, Victoria; Mr. and Mrs. Frank Ching, Vancouver; W. B. Conway, Nanaimo, and J. H. Ravenfield, Victoria.

Miss Helen Hargus of Ganges has been the week-end guest of Mr. and Mrs. Thomas Reid, Burgoyne Valley, Fulford.

P. D. Walker of Victoria was a visitor to Ganges, where he spent the Easter holidays.

Miss Amy Vye has left for Victoria, where she will spend a week with friends before resuming her duties at the Divide School.

H. Peter of Ganges spent the Easter holidays in a motor trip over the Malahat Drive to Cowichan Lake, where he was the guest of his parents.

HOBOS ARE TO ELECT NEW KING

Bellingham, Wash., April 2.—The Grand Order of American Hoboes must choose a new king to preside over their destinies next New Year's Day.

J. Leon Lazarowitz of New York, who arrived here yesterday from Ketchikan, Alaska, announced his intention of casting aside the worries of the purple and declared he had called a special hobo convention to meet at Pershing Square, Los Angeles, on January 1, 1930. He expects the hobos to elect another sovereign.

The organization now has 1,889 members, according to Lazarowitz.

WED BY PROXY TO COME TO CANADA

Dutch Girl to Be Remarried on Arrival in Montreal

Montreal, April 1.—Married by proxy in Holland to her sweetheart in Canada in order that she might comply with the regulations and come out to join him in a new home he has built up here, Miss Box, of Fredericton, New Brunswick, has now become Mrs. Zeeger Denek, and will sail on April 2 for this country. The couple will be remarried in Montreal when the young lady arrives next week.

The arrangements were made by the Canadian National Railways. Zeeger Denek is only another example of how quickly a young man can become established on the land in Canada. He came to this country, worked in the Brampton, Ontario, in October of last year he purchased a fourteen-acre truck farm at Huttonville, Ont., and in addition to carrying on market gardening he established some very fine greenhouses and does considerable business along this line. Mr. Zeeger met his bride while attending the horticultural college at Fredericton in Holland, prior to emigrating.

"MA" KENNEDY QUESTIONED

Evangelist's Deposition Given Behind Barred Doors in Portland; Press Excluded

Portland, Ore., April 2.—Behind barred doors of a court house room last night, Mrs. Minnie Kennedy, mother of Almeda Temple McPherson, Los Angeles evangelist, was answering dozens of questions for a voluminous deposition the California Assembly will use in the impeachment trial of Judge Carlos S. Hardy.

Conducted by Cloyd D. Rauch, notary public, the hearing was attended by William Hornblower and Walter Little, California Assemblymen; Mrs. V. A. Ahlf, Mrs. Kennedy's attorney, and Rex Hardy, son of Judge Hardy.

The hearing lasted until well after midnight, and to-day the transcript of Mrs. Kennedy's testimony will be made public. Hornblower and Little said they would leave for California to-day.

PRESS BARRED

Although Hornblower and Little were agreeable to allowing newspaper reporters to attend the hearing, Mrs. Kennedy refused.

"I must think and to think I must have quiet, so you reporters can't stay," she declared. "I must concentrate on every question to help our dear friend Judge Hardy. Truth, honor and justice must be preserved."

Turning to a man on her right, who had not been taking notes, Mrs. Kennedy asked:

"What paper do you represent?"

"I'm Little from California," Little replied.

"Well, ain't that the limit?" Mrs. Kennedy said, and sat down.

Little told newspapermen he was anxious to "get down to business," augmenting his statement with "We're not going to space that woman anything. It will be the most exciting day of her life."

DISCLOSURES PROMISED

Previous to the hearing Mrs. Kennedy said she had been trying to get in touch with Judge Hardy by telephone. She failed.

The California examiners expected that in addition to the deposition, Mrs. Kennedy would be asked questions. They hinted the intricate problems of McPherson's Angelus Temple at Los Angeles might be revealed, and just what Judge Hardy rendered in return for the \$2,500 "love offering" cheque he received marked "legal."

EASTERNERS ON WAY TO COAST

Prominent Educationists to Attend Conference Here This Week

Winnipeg, April 2.—Eastern Canadian educationists are speeding West in impressive numbers to attend the triennial conference of the National Council of Education opening this week.

Among those who reached Winnipeg Sunday was the president of the organization, Colonel Harry Cockburn, former Lieutenant-Governor of Ontario, traveling in the private car, Loch Lomond. With him are C. W. Rowley, former principal of the University of Toronto, who retired recently from the Bank of Commerce, and Prof. G. M. Wrong of Toronto University.

Others arriving Sunday were B. K. Greer, chief public school inspector; F. S. Rutherford, technical school inspector; J. F. Power, senior separate school inspector; G. F. Rogers, high school inspector; Dr. J. B. McDougall, adolescent officer, department of education; and W. J. Dunlop, director of extension service, University of Toronto. Accompanying their husbands were Mrs. Greer, Mrs. Rutherford, Mrs. Rogers and Mrs. Dunlop.

The fact that the National Council of Education at its conference in Vancouver will entertain many of the world's leading educational authorities, university leaders, artists and dramatists indicates Canada's keen interest in cultural progress expressed here to-day by Col. Cockburn, president of the National Council of Education.

Col. Cockburn was enthusiastic concerning the educational conference at the Coast. "Despite the great distance from Europe to the Pacific Coast we will have outstanding men of letters with us from France and Great Britain. The effects the meeting will have on Canadian culture will be incalculable," he said.

The Toronto party was entertained during its stay here by R. D. Cotterell, general superintendent of the Canadian Pacific Railway, and E. C. Gilliat, managing secretary of the board of Trade.

Sir Charles Grant Robertson, C.V.O., principal of the University of Birmingham, England, spent Sunday with Chancellor Macphay of Manitoba University, leaving Sunday night for Victoria.

HAPPY BIRTHDAY

In an age when so many folks forget anniversaries, an easy way to give your friends pleasure is to take a new calendar, through with your book of birthdays and write the name of your various friends and relatives over their birth dates. A card that reaches one on that day of days never fails to please.

Silver Tea—Under the auspices of the Victoria Chapter No. 28, a silver tea will be held at the home of Legation, Quinsance, 1134 Pandora Avenue, on Wednesday evening, April 3, from 7:30 to 11 o'clock, when all legationaries and their friends will be made welcome.

Women's Canadian Club—At the meeting of the Women's Canadian Club to be held in the Empress Hotel on Thursday at 2:45, Major D. L. McKean will give an address on "Canada North of the Provinces." The address promises to be of unusual interest. There will be no meeting of the club to-morrow.

PERSONAL ITEMS

His Honor the Lieutenant-Governor and Miss Mackenzie entertained at a dinner party at Government House last night in honor of their guests, the Earl and Countess of Liverpool, and of the delegates from New Zealand and Australia to the Educational Conference to be held here and in Vancouver at the end of the week. About thirty guests were present, the table being arranged with vases of daffodils and mauve primulas, and mauve candles.

Mr. Thomas Miller, publisher of the Moose Jaw Times, is spending the week in Victoria.

Mr. and Mrs. A. J. Greathed of Vancouver are visiting in Victoria and are guests at the Oak Bay Hotel.

Mr. and Mrs. W. D. Pemberton have moved from Beach Drive to their new home on Foul Bay Road.

Mr. W. D. Carter K.C. of Vancouver, has returned to his home on the mainland after spending the week-end in Victoria.

Miss Doris Taylor of Victoria is spending several weeks at Salt Spring Island as the guest of Capt. and Mrs. V. C. Best of Ganges.

Mrs. C. A. Pyne of Vancouver is visiting in Victoria as the guest of Hon. and Mrs. P. P. Burden, Yale Street, Oak Bay.

Mrs. P. M. Linklater has returned to her home in Craigdarroch after spending the last two months in Southern California.

Mrs. Jack Rithel, Rockland Avenue, accompanied by Miss Josephine Rithel, has left to spend a few weeks in Southern California.

Mrs. George Purves has returned to her home at Argyle Court after spending the winter months in Winnipeg as the guest of her parents.

Colonel and Mrs. A. E. Harris, Esquimalt Road, will leave on April 13 for Halifax, Nova Scotia, to which port Col. Harris has been transferred.

Mr. and Mrs. T. W. L. Mutch, Fern Street.

Mr. and Mrs. W. J. Bonavia have had as their Easter guests, their daughter, Mrs. A. Macdonald, and granddaughter, Jeanne, of Point Grey, Vancouver.

Mrs. W. L. McIntosh entertained at the tea hour this afternoon at her home on Shasta Place in honor of her mother, Mrs. J. Macpherson of Winnipeg, who is her guest.

Mr. and Mrs. P. R. Fleming, who have been on a motor tour of California, as far south as Mexico, with Mr. A. B. Triles of Vancouver, have returned to Victoria.

Miss Inez Delmage of Vancouver has returned to her home on the mainland after spending the Easter week-end in Victoria as the guest of Mr. and Mrs. W. H. Ozard, Albany Road.

Mrs. J. U. McLachlan, formerly Miss Thelma Wilson of Victoria, accompanied by her two children, will arrive in Victoria Thursday on a visit to her father, Mr. W. H. Wilson, of October Mansions.

The Misses Adelaide and Helen Pearson, Alice George and Constance Heyland of Victoria have been spending the Easter week-end on Salt Spring Island, the home of Mr. and Mrs. Arthur Inglis, Ganges.

Mrs. T. G. McArthur who has been a guest at the Empress Hotel for some time will be a delegate to the National Conference on Education, representing the Manitoba Girl Guides Association, of which she is president.

Mr. and Mrs. Tom Sherwood of Vancouver have returned to their home on the mainland after spending the week-end in Victoria as the guests of the former's parents, Mr. and Mrs. A. R. Sherwood, Quadra Street.

Mrs. Alfred Smith, the Windermere Hotel, will leave at the end of the week for Vancouver where she will spend a few days prior to leaving for England, where she will spend a year as the guest of relatives and friends.

Mr. Jack Simpson of the Canadian Banknote Company, Vancouver, has returned to his home on the mainland after spending the Easter week-end in Victoria with his mother, Mrs. George Simpson, Government Street.

Mr. A. E. Robbins, manager of the Hotel Saskatchewan, Regina, is visiting in Victoria and is a guest at the Empress Hotel. Mr. Robbins has been appointed manager of the Royal Alexandra Hotel at Winnipeg and will leave shortly for Winnipeg.

Mrs. E. B. McCullum of Winnipeg is spending some time in Victoria as the guest of her father, Mr. W. B. Laidlaw, the Hotel. On Sunday afternoon Mr. Laidlaw entertained a large number of former Winnipeg residents, now resident or visiting here.

Dr. and Mrs. A. O. MacRae of Vancouver returned this afternoon to their home on the mainland. Mr. MacRae has been spending the last few weeks in Victoria as the guest of Miss Kate Gaudin and Dr. MacRae has been a visitor in Victoria over the week-end.

Mme. Eva Baird, who left for Mexico some weeks ago to fulfill a series of concert engagements, has been having a most interesting time in Mexico City, according to word received by friends in Victoria. She has given recitals under the patronage of the British Minister, Hon. E. Grey, C.M.G., and the wives of the American and German Ambassadors, and also gave a recital at the German Embassy.

Announcement is made in Vancouver of the appointment of Mr. and Mrs. Crawford of Kelowna, Vancouver, and formerly of Victoria, to Mr. Melvin Ramsay, Vancouver, and Mr. R. M. Ramsay, which will be celebrated at St. Mary's Anglican Church, Vancouver, on April 17 at 3:30 p.m. Miss Crawford, who resided in Victoria when her parents prior to their removal to Vancouver, has a number of friends in this city.

B.C. GRADUATE NURSES MEET

Association Holding Sessions in Vancouver; Committees Busy

Vancouver, April 2.—Initial proceedings of the annual convention of the B.C. Graduate Nurses' Association were held in the Chemistry Building of Vancouver General Hospital and in the adjoining nurses' home, Monday, when committee and council meetings were the order of the day.

A visit to the maternity department and infectious disease building of Vancouver General Hospital was made by members of the education department under the sponsorship of Miss Mabel Gray, R.N., during the afternoon, while a meeting of the public health nursing committee, presided over by Mrs. Isabel Gibb, was addressed by Dr. E. Johnston Curtis and Dr. D. M. Meekison.

Reports were received from the various public health nursing committees, and the following officers were appointed: Vice-chairman Miss M. McEwen, secretary Miss E. Lumston, library committee Miss Meta Hodge (Victoria).

PREVENTIVE MEDICINE

Education of the populace in health measures and the use of preventive measures in dealing with diseases formed the main duties of the public health nurse. Dr. Meekison stated during his discourse on "visiting nurses and orthopedics."

Dr. Meekison declared that every fracture of the elbow in a child should be dealt with at once by a competent orthopedist as it was the cause of many incurable disabilities. Rheumatism was an excuse given by many physicians for their refusal to accept the responsibility of the bone, the speaker stated, and urged the necessity for immediate treatment of such cases by competent orthopedic practitioners.

The speaker was emphatic in his statement that there should be no untreated feet. He also advised members of the nursing profession to use precautionary methods in dealing with patients who had tendencies to curvature of the spine. Very little was known about diseases relating to the spinal column and a consultation with an orthopedist was most important.

PEDIATRIC NURSING

"Some aspects of pediatric nursing" was the subject of the address given by Dr. E. Johnston Curtis. Adult diseases assuming a different degree of seriousness with the child, Dr. Curtis declared, and consequently more attention to minute detail is required.

In children, a considerable portion of disease is congenital or hereditary, the speaker continued. He stressed the importance of the part which hygiene plays in the life of the child and declared that the nurse must be largely due to faulty nutrition.

A successful silver tea was held at the home of Mrs. M. Sweeney, Trutch Street, by the ladies of St. Andrew's Altar Society on Easter Monday, under the sponsorship of Mrs. M. Doyle who was assisted in serving the guests by the Misses Castellain and L. Sweeney. Mrs. J. L. Thompson and Mrs. E. Hughes presided over the prettily-arranged tea table which was centered with daffodils and sweet peas. During the afternoon vocal solos were given by Madeline Griffin, Miss J. Charlebois and Mrs. Styles Sel. The winner of the fruit cake, donated by Mrs. Sweeney, was Mrs. W. Hawell.

Mr. and Mrs. D. V. McGary entertained at their home on Hillside Avenue on Saturday evening with seven tables of bridge in honor of Miss Dean and Rabbi Levi, whose wedding will take place shortly. Among those present were Miss Bean, Rabbi Levi, Mr. and Mrs. E. Bean and Mrs. B. Burrell, Mr. and Mrs. F. Norton, Mr. and Mrs. G. A. Macdonald, Mrs. C. C. Pettigale, Mr. and Mrs. Goodwin, Mr. and Mrs. J. Trace, Mr. and Mrs. H. Brown, Mr. and Mrs. Frank Honor, Mr. and Mrs. Jack Fiedler, Mr. and Mrs. W. Knowles, Miss Anderson and Mr. Moriarty.

Princess Patricia Lodge held a farewell party at the home of Sister Mrs. Restell on Saturday in honor of Sister Lawson, who is leaving for the West Coast to join her husband. The worthy president, Sister Mrs. Jane, with a few well-chosen words, presented Mrs. Lawson with a silver bread tray, to which she responded with thanks to all officers and members of the lodge.

Present were Sisters Mrs. Jane, Mrs. Lawson, Mrs. E. Latham, Mrs. Skelland, Mrs. Armstrong, Mrs. Herring, Mrs. Huckle, Mrs. Macpherson, Mrs. V. C. Christy, Mrs. Cooper, Mrs. Carter, Mrs. Tilly, Mrs. Burnett and Mrs. Spavin. The hostesses, Mrs. Restell, served refreshments, bringing a most enjoyable evening to a close.

Mrs. A. H. Stafford and Miss Annie McKennie were joint hostesses at a kitchen shower at the home of the latter, 824 Shelburne Street, Wednesday evening, in honor of Miss Meta Caldwell, a popular bride-elect. The many beautiful gifts were concealed in a "covered wagon" driven by a miniature bride and groom under an arch of apple blossoms. The rooms were prettily decorated with canary yellow and emerald green streamers and daffodils. Dainty refreshments were served, the table being centered with a three-tier wedding cake. The invited guests were Mesdames R. Caldwell, Fuller, Burns, Ellis, Bas, H. MacDougall, S. Strange, F. Freer, Thomas, F. Middleton, J. McKenzie, P. Drysdale, Campbell, D. McKenzie, Cullison and A. H. Stafford, Misses Meta Caldwell, Sylvia Bass, Marie Graham, Kathleen Caldwell, Nellie Brown, Ann Knowles, Margaret Caldwell, Hilda Glass, Helen Clark, Gladys Cook, Helen Campbell, Gladys Johnson, Mary Allan, Betty Ridgway, Rennie Glass, Beth Campbell, Eva and Jennie Hall, May, Fanny, Lily and Annie McKennie.

Guests at the Quilicum Beach Hotel during the week-end were Mr. C. H. Rutherford, Mr. R. Musgrave, Mr. and Mrs. H. M. Archibald, Major and Mrs. H. A. Hogg, Mr. H. B. Plisset, Mr. de S. Duke, Mr. H. A. Tomalin, Mr. Hew Patterson, Mr. and Mrs. Swinerton, Major Gus Lyons, Mr. N. W. P. Pirrie, Mr. F. Colman, Mrs. H. B. Isaacs, Mr. P. M. Isaacs, all of Victoria; Mr. and Mrs. J. B. Love, Miss E. Reynolds, Mr. and Mrs. W. J. Bell and son, Mr. and Mrs. C. E. Brown, Mr. and Mrs. William Kitz, Mr. and Mrs. J. W. Wilkinson, Mr. and Mrs. N. A. English, Mr. and Mrs. M. Griffin, Mr. and Mrs. A. N. Robertson, Mr. and Mrs. H. B. Robertson, Mr. and Mrs. J. A. Birmingham, Mr. and Mrs. J. L. Bancroft, Mr. and Mrs. E. W. Arnold, Mr. and Mrs. E. A. Willsher, all of Victoria; Mr. N. G. Symons, England; Mr. and Mrs. Allan, Mrs. A. L. Brown, Miss M. Williams, Mr. C. P. Wilson, Mr. G. W. Allan, Mr. G. H. Davies, Mr. E. P. Hoffman, Winnipeg; Mr. and Mrs. G. W. Kindersley, Vancouver; Mr. R. Bradshaw, Montreal; Mr. and Mrs. W. Wiley, Seattle; Mr. and Mrs. Evans and daughters, Edmonton.

WINS UNIVERSITY CLUB SCHOLARSHIP

Toronto, April 2.—Miss Ellen Hemmon, B.A., of Mount Allison University, Sackville, N.B., won the traveling scholarship awarded annually by the Canadian Federation of University Women for 1929-30. Miss Hemmon is dean of women and instructor in the department of French at Mount Allison.

B.C. GRADUATE NURSES MEET

Association Holding Sessions in Vancouver; Committees Busy

Vancouver, April 2.—Initial proceedings of the annual convention of the B.C. Graduate Nurses' Association were held in the Chemistry Building of Vancouver General Hospital and in the adjoining nurses' home, Monday, when committee and council meetings were the order of the day.

A visit to the maternity department and infectious disease building of Vancouver General Hospital was made by members of the education department under the sponsorship of Miss Mabel Gray, R.N., during the afternoon, while a meeting of the public health nursing committee, presided over by Mrs. Isabel Gibb, was addressed by Dr. E. Dr. Meekison declared that every fracture of the elbow in a child should be dealt with at once by a competent orthopedist as it was the cause of many incurable disabilities. Rheumatism was an excuse given by many physicians for their refusal to accept the responsibility of the bone, the speaker stated, and urged the necessity for immediate treatment of such cases by competent orthopedic practitioners.

The speaker was emphatic in his statement that there should be no untreated feet. He also advised members of the nursing profession to use precautionary methods in dealing with patients who had tendencies to curvature of the spine. Very little was known about diseases relating to the spinal column and a consultation with an orthopedist was most important.

PEDIATRIC NURSING

"Some aspects of pediatric nursing" was the subject of the address given by Dr. E. Johnston Curtis. Adult diseases assuming a different degree of seriousness with the child, Dr. Curtis declared, and consequently more attention to minute detail is required.

In children, a considerable portion of disease is congenital or hereditary, the speaker continued. He stressed the importance of the part which hygiene plays in the life of the child and declared that the nurse must be largely due to faulty nutrition.

BRIDE'S BELATED HONEYMOON TRIP

Wife of Commander Byrd's Radio Man to Sail on Aorangi

Vancouver, April 2.—A bride who is to join her husband in New Zealand and enjoy her honeymoon almost a year after her marriage sailed from here on Wednesday aboard the Canadian-Australasian liner Aorangi. She is Mrs. V. Berker, wife of the radio expert and aeroplane pilot with Commander Byrd's Antarctic expedition, who was transferred for duty in New Zealand from where he will maintain touch with the explorers, and study the effect of atmospheric conditions on radio. The couple were married in May last and shortly after he had to leave for the south with Byrd.

James Bay P.T.A. Busy on School Playground Work

The bazaar, conducted by the James Bay Parent-Teacher Association in the Assembly Hall of South Park School last week, was such a success from a monetary standpoint, that the members of the association are busily engaged in the arrangement of other such affairs, to raise funds in prospect of putting the playgrounds of the three schools in the district into better condition. The proceeds of the bazaar amounted to \$155, which, with other money, places the association in excellent financial condition.

The first act of the association will be to assist the School Board in finishing the work commenced on South Park playgrounds and as time goes on Kingston Street and Beacon Hill schools will receive financial assistance.

The James Bay Parent-Teacher Association is now well organized and a band of hard working officers chosen from both teachers and parents are striking out determinedly for their objective the improvement of playgrounds and general surroundings of the three schools in the district.

Parents interested in any one of these schools are invited to become members of the association and help along the work in hand. The regular monthly meeting will be held in South Park School, Monday evening, April 8, at 8 o'clock.

ST. ALBAN'S GUILD—ST. ALBAN'S LADIES' GUILD

St. Alban's Guild—St. Alban's Ladies' Guild will resume their social activities on Wednesday, April 3, with a daffodil tea. There will be home-cooked work, a 3-candy stalls with a bean tub, for any of which the ladies will be glad to receive donations. The tea will be opened at 3 o'clock by the Rev. W. Barton. In the evening the forthrightly card party will start again, at which it is hoped there will be a good attendance. Refreshments will be served and good prizes given. Whist will be played.

ST. MARK'S SALE—ST. MARK'S W.A. CLOVERLEAF

St. Mark's Sale—St. Mark's W.A. Cloverleaf will hold their Easter sale at St. Mark's Hall on Wednesday, April 3, at 2:30 p.m. There will be fancy work, plain sewing, home-cooking and superlatives. The sale will be followed by a dance in the evening.

CENTRAL W.C.T.U.—THE MONTHLY MEETING OF THE CENTRAL C.G.F.E.B.

Central W.C.T.U.—The monthly meeting of the Central C.G.F.E.B. will be held in the Y.W.C.A. on Thursday at 3 p.m. Miss A. Sproule will speak on "Canadianism."

B.C. WOMEN HURT IN EXPLOSION IN SAN FRANCISCO

San Francisco, April 2.—A sewer gas explosion in the downtown south-side district of this city shattered scores of windows last night, injured two women and threw a manhole cover into the air 100 feet.

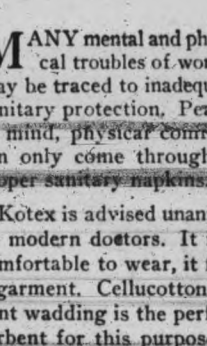

The injured persons are Miss K. Kogos thirty-two, Vancouver, B.C., and Mrs. M. Dallas, twenty-seven, a traveling companion. They were passing through the neighborhood when the explosion occurred. The women were treated at the Harbor Emergency hospital for severe lacerations of the legs caused by flying glass.

A Lesson in Personal Hygiene

This is the advice of leading doctors: "Discard makeshift sanitary napkins—don't risk good health."

MANY mental and physical troubles of women may be traced to inadequate sanitary protection. Peace of mind, physical comfort, can only come through using proper sanitary napkins.

Kotex is easy to adjust, to fit individual needs. And easy to dispose of—follow directions in each package. Get it without hesitancy at any drug, dry goods or departmental store.

Eliminating Worry
Vital in Treating
Tuberculosis

By DR. MORRIS FISHER

It has been emphasized in previous articles in this series that there is no one best climate for tuberculosis, and that many factors enter into the choice of the place to which the patient with this disease is to be sent, if he is to leave home at all.

Certainly he should not travel into a community without sufficient funds to take care of him for at least a year, to provide him with good food and lodging, and to make sure that he will have competent medical attention.

MENTAL ATTITUDE

The satisfaction of the patient's mind is of the utmost importance. A mother will not get well if she is constantly worried about the condition of the children that she has left at home.

A business man will not recover as well in a strange climate as at home if he is constantly worried about his business. It is for this reason that many institutions have grown up near all of the large cities in our country.

The routine of treatment in such instances is of greater advantage than any possible advantages to be derived from climate. The biggest advantage of an institution is the fact that the patient can be educated in the proper routine of life leading to recovery.

The second reason for treating a patient in an institution rather than at home is the advantage of a change. As pointed out by Dr. James Alexander Miller in his complete consideration of the subject in the American Review of Tuberculosis, healthy people, when

tired, experience a tremendous improvement in their general physical and mental tone by a complete change of environment.

This is all the more true of those with tuberculosis. People who live in apartments or tenement houses frequently do better merely by transfer to a day camp near the seashore or in the country.

OXYGEN AND REST

The advantages of open-air life and open-air sleeping are now recognized by common experience. These increase the general tone of the body, quiet the nervous system and favor relaxation and sleep.

Dr. Miller made a complete survey of various resorts for the care of the tuberculous in this country, as a result of which he has drawn up certain definite conclusions relative to the importance of climate in this disease. These conclusions are so significant that they will be given in full in a subsequent article.

Women Approve
New Allotment
Liquor Profits

Vancouver, April 2.—To express their appreciation of the act of the Government in ruling that the profits from the sale of liquor will not be earmarked for the maintenance of mothers' pensions and hospitals, but will be used for other purposes, and allow these institutions to be cared for from other funds, the Local Council of Women in regular session Monday afternoon in the Women's Building, decided to forward a letter to the Government, and to the Provincial Council of Women.

GIFT CHEST

If the Christmas rush has worn you out, why not try a gift chest, beginning now? Whenever you see a real bargain that is attractive, purchase it and store it away. Weddings, birthdays, showers and Christmas all lose their terror for the woman who keeps her gift box stocked.

NOVEL GARNISH

A pretty and a different garnish for lamb chops or fried chicken is made by slicing small oranges in very thin whole slices and placing an even thinner rim of pimento top of them.

The latest use for the X-ray is to peer into the heart of a tree.

MOTHER GIVES SKIN FOR HER CHILD

Twice through the Valley of the Shadow for the life of her child is the record of Mrs. Owen E. Reynolds, Fort Worth, Texas, pictured at the right. Above is Edith Reynolds, six, for whom the mother submitted to an operation and gave eighty square inches of skin after the child had been badly burned when her clothing caught fire from a gas stove while she was playing with her dolls. Surgeons removed the skin an inch at a time and transplanted it to the child's body.

Your Baby and Mine

By MYRTLE MEYER ELDRED

Mrs. Eldred will be glad to answer all questions pertaining to babies and children. A stamped and self-addressed envelope forwarded to this office will bring a personal reply.

Nervous Handling of Child is Depreciated

From the days when children were rocked in cradles and jumped on paternal knees in an endeavor to hush their cries, babies have been constantly treated to "movements" of one kind or another. Seemingly, a crying baby has to be stopped some way, and the usual way is to bounce him around so that in the joy of the new exercise he forgets what he wanted to cry about.

There are certain types of mothers who have fostered this fault to ridiculous degree. The child never opens his mouth for any cause, righteous or otherwise, that he isn't shaken, jumped up and down, patted hard on some convenient portion of his anatomy or teetered back and forth in order to distract his attention. The baby who lets out a tired wail and is then wheeled back and forth again violently in his carriage is just one more illustration, but we have in mind the older child who sits on his mother's lap and who is treated to a constant succession of violent movements to make him stay quiet. Could anything be more amusing? In order to teach him to be placid and quiet, we constantly shake him around! Then we wonder why the child hasn't a placid bone in him.

From babyhood every waking moment has been concerned with activities of one kind or another. Battles are shaken in front of him, carriages rocked and wheeled back and forth or he is jogged up and down on mother's lap. At about two years he is active enough naturally, but his whole education has been toward incessant activity. What little desire he might have had to sit down for even one minute in comparative inactivity has been educated out of him.

At this time mothers begin to notice the full effect of their previous actions. The child is winny and fretful. He doesn't want to play, he hangs to his mother and whines because his body is too tired for action, but his nerves accustomed to some constant stimulation, demand satisfaction.

If mothers would only allow the baby to lie quietly even if he howls occasionally for relaxation, if they could sit down and watch a crying child and make no effort to do anything for him, they would find a great many times that he would cry for fifteen or twenty minutes with the reddest face and a violent waving of arms and legs, and would then quiet down. An expression as satisfied as a kitten after a saucerful of milk would come over his face. His whole body, eager for exercise, has been satisfied. He can lie and look around, stand on his head and view the ceiling, or roll over on his stomach and stand on his toes and forehead. No one has deprived him of the joys of his natural exercise by hastily picking him up and jumping him up and down murmuring the soothing words, "Shush, shush, baby mustn't cry." Did I say soothing? I should have said nerve-shattering. Let the baby think up his own exercises and cry occasionally if he wants to. He loves it.

NEWSY LETTERS

A woman, famous for her interesting letters, keeps a series of large manila envelopes in her desk, each having the name of a correspondent. Every time she sees an item that would interest one of them, she clips it and sticks it into his or her envelope until her next letter.

SOFT HANDS

A cake of good soap, or nail brush, a small bottle of hand lotion and a small slice of lemon should occupy a small shelf at every sink. If housewives use them all when finished with the dishes or cleaning the house, they can easily preserve their hands' beauty.

MOTHERS
and
THEIR CHILDREN

CLEAN FACES WHEN TRAVELING

One Mother says: "Every mother knows how difficult it is to keep the children clean when traveling, even short distances. I have solved the problem by carrying in my hand bag a rubber tobacco pouch in which I have a small moist sponge. I usually carry enough extra handkerchiefs along to use as towels and in this way I can have a fresh-looking child when I reach my destination."

London's most distinguished beauty expert

Madame JACOBSON

recommends one treatment . . . and only one
to retain the charm of facial loveliness

Royalty and the most fashionable women in the British Isles learn from Madame Bertha Jacobson a simple home treatment to keep the skin lovely and youthful

"I urge my clients to use only the soap blended of palm and olive oils. It provides that absolute skin cleanliness which must be the foundation of beauty."

Bertha Jacobson

11/12 DOVER STREET, LONDON, W. 1

Madame Bertha Jacobson has taught the essentials of beauty culture to many of the world's most celebrated beauty scientists.

ROYALTY and the smart women of London have, for years, entrusted all their beauty problems to Madame Bertha Jacobson of London's select West End. Those in search of the technique of beauty culture consider her teaching invaluable.

After 22 years' experience as beauty dictator, Madame Jacobson turns to one of the simplest of all beauty treatments for home use.

Madame Jacobson's invaluable advice
on skin care

"To enable my clients to safeguard their complexions—to retain radiant skin texture," says Madame Jacobson, "I provide them with my own special Skin Food Creme to be used at night and I ask them to use my famous Skin Tonic after cleansing the skin."

"I urge them to use no soap other than Palmolive, as I have found that the bland oils of which this soap is made provide the absolute skin cleanliness which must be the foundation of beauty," Mme. Jacobson writes us. "At the same time, I warn them of all the harsh effects of soaps not made exclusively of these oils."

In these brief phrases, London's chief exponent of beauty culture voices an opinion held by specialists on skin care all over the world.

Why palm and olive oils

The poisonous, the dangerous secretions of dirt and dust, of make-up and cream which find their way deep into the pores must be removed, Jacobson will tell you. Palm and olive oils, as they are blended in Palmolive Soap, act to soften the skin, to cleanse the pores, to refresh the natural coloring. They provide the natural way to skin beauty.

In Canada this is, of course, well known. Leading specialists advise the Palmolive method of skin care wherever beauty culture is practiced.

The method they use is that subscribed to by Madame Jacobson. This treatment, night and morning: make a creamy lather of Palmolive Soap and warm water. With both hands massage this well into the skin two minutes, allowing it to penetrate the pores. Then rinse, first with warm water, gradually with colder. A final rinse with ice water is refreshing as an astringent.

For a dry skin, a touch of cold cream before adding powder and rouge; for oily skin, an astringent lotion, a surface application of vanishing cream before make-up. That is what specialists tell you!

Madame Jacobson, in her London salon; Lina Cavallieri, in Paris; Pessl, in Vienna; Elise Bock, in Berlin—all over the world specialists in beauty care recommend Palmolive, which is the leading soap in Canada and 48 other countries.

A priceless formula embodying the precious oils of palm and olive, famous since the days of Cleopatra for prolonging health and beauty.

MRS. COOLIDGE GOES A-SHOPPING

When Mrs. Calvin Coolidge, the Northampton, Mass., housewife, went shopping the other day, she took with her on a tour of the stores, Mrs. B. Hills, a friend of school days. The smiling shoppers are shown here as they set out, with one of the erstwhile White House dogs, from the Coolidges' nine-room duplex in Northampton.

MENUS FOR THE FAMILY

By SISTER MARY

Baked Stuffed Apples

Four large apples, 8 prunes, 4 tablespoons lemon juice, 1 tablespoon butter, 1/2 cup sugar, 1/4 cup water.
Soak prunes in cold water for several hours. Remove stones and chop meat. Pare apples and cut a slice from stem end. Remove core, taking care not to break fruit. Fill cavities of apples with chopped prunes moistened with lemon juice. Cover with slice cut from end and place in a small baking dish. Make a syrup of sugar, water and butter and pour over apples. Bake in a slow oven until apples are tender.

Baste often with syrup in dish. Cool and serve with plain cream.

Golf Fans Praise Youth's Showing In Championship Final

Seventeen-year-old Norman Wallace Thrills Large Gallery by His Fight in Deciding Match for B.C. Title; Carried "Chuck" Hunter of Tacoma to Final Hole Before Yielding; First Major Tournament for Youngster, for Whom a Great Future is Predicted.

showing made yesterday by Norman Wallace, seventeen-year-old champion of the Macaulay Point Golf Club, in the final of the British Columbia amateur golf championship at the Colwood Golf Club. Wallace surprised the large gallery by carrying the famous "Chuck" Hunter of Tacoma to the thirty-sixth hole, and losing one up. This was the first time he took part in a big tournament.

ence and ability in tournament play rated as the man to beat when the championship opened. This bit of a Scotch lad, who had the nerve last year to go out and win the club championship at Macaulay, went into the tournament without anyone holding out much hope for him against such an array of talent. Most of the folks expected he would lack the nerve and steadiness required to match strokes

AN EARLY BIRD
Another angle that makes his showing all the more creditable is the fact that on Sunday morning he arose at 4 o'clock to carry out his duties as

newspaper carrier. He then proceeded to Colwood to play thirty holes of golf and win both his matches. In the morning he defeated Freddie Wood of Vancouver 2 and 1 and in the afternoon eliminated Harold Brynjolfson at the twentieth hole.

At the end of the morning round yesterday Hunter was two up on Wallace, but only after shooting some of his finest golf on the course.

BOY WORTERS

Montreal, April 2.—The trophy presented by the late Dr. David A. Hart of Montreal, to be awarded to the National Hockey League player who was the most valuable to his team in each season, has been

for the season 1928-29 to Roy Worters of the New York Americans, according to announcement made from the National Hockey League offices here.

LOU LIMA BEATS A FINE WORLD FIGHTER WHO MEETS "DUSTY" MILLER SATURDAY HAS MET MANY GOOD MEN

Will Joe Lohman, Toledo light-heavyweight, put a halt to "Dusty" Miller's winning streak? That's the question that will be asked in the local pugilistic circles as the date of the Miller-Lohman bout rapidly approaches. Lohman has a record of 10 wins and 10 losses, and a number of outside fighters during his residence here, in fact he has yet to lose a fight to the man who

rounds in a localing with Miller was Jimmy Lyall, Victoria's light-heavyweight.

A list of some of Lohman's bouts follows:

Young Wm. Stribling, Kansas City, Mo., lost decision, ten rounds.

Barney Wright, Des Moines, Ia., won, ten rounds.

George Mailey, Denver, Colo., draw four rounds.

Jack Sawyer, Brooklyn, N.Y., lost decision, ten rounds.

Harry Greb, Omaha, Neb., lost decision, ten rounds.

Romero Rojas, Bayonne, N.J., won, twelve rounds.

Tommy Loughran, Erie, Pa., won, ten rounds.

He also took the next hole to square the match. The next three holes were halved. At the thirty-third, Wallace put his tee shot into the bunker and lost the hole when Hunter got a putt. The next three holes were halved, but at the thirty-fourth, putting his tee shot into the woods. He played safe or onto the fairway but lost the hole. He then tried to pull the match out of the fire by winning the thirty-fifth with a par four after laying Hunter a half stymie, but Hunter got a half on the last hole to end the match.

After playing erratic golf practically the whole day, Hunter came through

Johnny Risko, Toledo, Ohio, draw, twelve rounds.

Tommy Loughran, Philadelphia, Pa., lost decision, ten rounds.

Bud Gorman, Jamestown, N.Y., lost decision, ten rounds.

Paul Berenbach, Atlanta, Ga., drew ten rounds.

Gene Tunney, New York City, drew, ten rounds.

Tiger Flowers, Columbus, Ohio, lost decision, ten rounds.

Ricko, Toledo, Ohio, won, twelve rounds.

Tiger Flowers, Canton, Ohio, Rapid, drew, ten rounds.

Young Wm. Striblein, Grand Rapids, drew, ten rounds.

Frank Thomas won the championship of the first flight, defeating F. Wilson at the twentieth hole. Both were players. At the time of the conclusion of the finals, the prizes were presented by T. McPherson, retired prizefighter, and secretary of the association.

The cards for the morning round were as follows:

Out-Hunter . . . 555556345-42

Mich. won, ten rounds.
Bud Gorman, Milwaukee, Wis., won, ten rounds.
Matt Adgle, Philadelphia, Pa., draw.
Jimmy Slattery, Buffalo, N. Y., won, six rounds.
Jack Renault, New York City, lost, division, ten rounds.
Maxie Burke, Toledo, Ohio, draw, twelve rounds.
Tom Maurillo, Philadelphia, Pa., lost, decision, ten rounds.
Young Bob Fitzsimmons, Dayton, Ohio, won, twelve rounds.
Jack Fitzsimmons, Philadelphia, Pa., lost, decision, ten rounds.
Chuck Wigzell, Indianapolis, Ind.,

In—Hunter . . . 3455553445—36
Wallace . . . 445563555—44

The cards for the afternoon row were as follows:
Out—Hunter . . . 555689344—36

LAST RITES AT THE GOULIN TOMB IN MONTREAL

Montreal, April 2.—The body of Sir Lomer Gouin, late Lieutenant-Governor of Quebec and for many years its Premier, was buried yesterday in the Cote des Neiges Cemetery here, the state having bestowed at the funeral services in Quebec City and in Montreal all the honors that may be accorded the country's illustrious dead.

The services commenced early yesterday morning in the Basilica in Quebec City, when 40,000 people braved a snow-laden gale to file the route of the cortege.

Eight hours later the last rites were carried out at the Goulin family vault in the Cote des Neiges Cemetery on the slopes of Mount Royal.

Eskimos Stage Dying Rally But Vancouver Protect Their Lead

Three Goals Down Seattle Try Desperately to Pull Second Play-off Game Out of Fire But Percy Jackson Keeps Them at Bay; Score is 3-1; Lions Need Win To-night to Cinch P.C.H.L. Title; Esks Play Indifferent Hockey; Jack Walker Presented With Wrist Watch.

Seattle, April 2.—The final play-offs of the Pacific Coast Hockey League may be ended in Vancouver to-night when the Eskimos and Lions get together in the third game of the series. The Lions are two games to the good through their 3-1 win here last night and the 2-0 defeat they handed the Seattle team in Vancouver on Friday. One more victory will cinch the championship.

A big boatload of Seattle fans left here last night, however, determined to give their team some real support in the last dying effort.

The Eskimos deserved to lose their game last night. They were over-anxious in spots, listless in others, yet finished up the game with a desperate attack that, catching Vancouver one man short for all of eight consecutive minutes, was only unsuccessful because young Percy Jackson was on the job. Phillips, Beatty, Jerwa and McAdam went off in a row in this epidemic of fouling, but even with that handicap the Lions were able to keep the Eskimos from all but one goal.

A big boatload of Seattle fans left here last night, however, determined to give their team some real support in the last dying effort.

The Eskimos deserved to lose their game last night. They were over-anxious in spots, listless in others, yet finished up the game with a desperate attack that, catching Vancouver one man short for all of eight consecutive minutes, was only unsuccessful because young Percy Jackson was on the job. Phillips, Beatty, Jerwa and McAdam went off in a row in this epidemic of fouling, but even with that handicap the Lions were able to keep the Eskimos from all but one goal.

The Lions got going early and with a goal by Sandy Sanderson, which was deflected off Dan Daly's skate, were able to fall back into their tight three-man defence and protect that lead all the way.

A hot shot from Cummings' stick after Joe Jerwa had carried the puck through made the game that much safer, while McAdam beat Levine with a soft one from the blue line that the Seattle goalie did not even see, also in that third period. Then came two belated Seattle goals, really and the best hockey of the night.

Young Percy Jackson stepped into the breach with a splendid display of goal tending, however, and only the one goal resulted.

The entire Vancouver team played good hockey, while Reinken, Dan Daly, Sutherland, Browne and Walker did best for the Eskimos.

THE LINE-UP
Vancouver—Jackson, Brennan, Jerwa, Sanderson, Somers, Phillips, McAdam, Cummings, Arnett, F. Jerwa and Dunn. Seattle—Levine, Borland, Daly, Harris, Brownie, Walker, Sutherland, Orrand, Johansson and Reinken.

SUMMARY
First period—1, Vancouver, Sanderson, 12:16. No penalties.

Second period—No score. Penalties—Sutherland, McAdam.

Third period—2, Vancouver, Cummings from Jerwa, 4:39; 3, Vancouver, McAdam, 8:14; 4, Seattle, Browne from the slopes of Mount Royal.

Bobby Jones on Golf

In line with my recent remarks about the iron play being the real offensive part of the game, it may be interesting to see just what sort of iron play places the ball close to the hole. There is ever in every golfer's mind this problem: is it better to use this club and hit hard or that one and spare the shot? Throughout a full round of golf do the forced shots or the spared shots finish closer to the hole on the average?

An old Scottish caddy at St. Andrews does not look with eyes of favor upon the golfing pit of an American for whom he must carry. Usually the bag contains a full set of numbered irons, designed to cover the whole range of iron play, reducing the gap between the clubs to the least possible number of yards.

Yet with this apparently comprehensive set it is rare when exactly a full shot with any club is required to place the ball at the side of the hole. To stop in what I call an offensive position, where there may be reason to expect to hole out in one putt, neither distance nor direction may be off more than a few feet. To obtain the nice graduation of range in the club itself is, of course, an impossibility. The player must control the length of the shot to the same degree that an outfielder must control the length of his throw to home plate.

SPARED SHOT THOUGHT HARD

The control of a spared shot is considered to be beyond the reach of the average player. He is thought to be on his guard when he is to hit a sparing away at each shot with every ounce of power in his body. But it is not necessary that a person should be able to play a mashie shot with a mid-iron. All that he needs to do is to bridge the gap between each of his many clubs so that he may have control throughout every foot of the difference between his wooden clubs and his putter. Every stroke which utilizes less than the full power of the club may be called a spared shot, and I think the spared shot within certain limits is more effective in the long run than that which forces a club to the utmost.

Of course, I am speaking about getting close to the hole, and it is well to remember that to do that it is not enough to hit the ball on line. I have heard many players tell of hitting a shot directly at the flagstick but add that it finished at the back of the front of the green, as though that were not their fault. They would likely consider the shot a bad one if its length were exact and its direction forty feet off. But range and direction are equally necessary. The subsequent putt is not made a bit easier by the fact that the second shot was on line.

ONLY CONSIDERATION IN FULL SHOT

I have found that when I play an "absolutely full shot" with any iron club I usually find myself many feet past the hole. There must be some place where the distance is exactly right for a full shot, but I am never able to find it. I think, though, the explanation may not be hard after all. When the player has once determined that a full shot is required, he hits the ball hard, swinging himself only with the direction. Very likely in sizing up the shot he has unconsciously allowed himself a little leeway. But in playing less than a full shot he has both distance and direction constantly in mind. His aim is to drop the ball at a certain point, and his long practice and training enables him to do it. To use the analogy of the baseball player again, it is the difference between "throwing the ball as far as possible and throwing it to a definite spot."

(Copyright, 1929, by the Bell Syndicate, Inc.)

ATLIN SUFFERS LOSSES IN FIRE

Juneau, Alaska, April 2.—Fire early yesterday destroyed the Government Liquor Store, the Masonic Lodge Building, the Kirtland Hotel and three stores at Atlin, B.C., north of Juneau. It was believed the blaze started from a chimney fire. The loss is large.

WILL PLAY UNUSUAL ROLE IN TURF WORLD

The most unusual role of the turf world, that of a owner riding his own horses, will be enacted at Bowie, Md. when Earl Sande, one of the greatest jockeys of all time will ride his own thoroughbred racers.

With the recent announcement that Sande had entered three of his horses in the Prekness race, race followers are enthusing over the dramatic possibilities in coming Maryland meetings.

Sande's three entries for the big event are Safety Pin, Near By and Hermitage.

When Sande quit the saddle a year ago, it was generally believed that his increasing weight never would permit him to essay a comeback as a jockey. Since his plans to ride again were announced, it has been whispered in some quarters that he is returning to the saddle to recoup lost finances. This isn't exactly so; he is returning to the saddle because he loves it and he thinks he can boot out of his own horses home winner in the classic Prekness.

SPORT JOTTINGS

EAST LIKES WESTERN HOCKEY RULES

The East once again is apparently willing to admit that a number of rules in vogue this season in the Pacific Coast Hockey League are better for the game. Frank Patrick, president of the Coast League, and the man who has introduced more rules than all the N.H.L. officials put together, is beginning to give recognition from the Eastern angle as the "man who knows how to make regulations. In the past the N.H.L. has laughed at Patrick's rules but one by one has adopted them.

Recently in New York a game was played under some of the Western rules, which permit kicking the puck and forward passing in all zones. However, whether the league will adopt these rules remains to be seen.

James S. Collins writing in The New World has the following to say: "The first National League hockey game played here under Western rules, which permit kicking the puck and forward passing in all zones, made a big hit with the crowd in the Garden Sunday evening. The game between the Rangers and the Pittsburgh Pirates, bristled with action from start to finish. As a result of the experiment next season is almost sure to see the Coast rules, at least in modified form, governing all league games. As Otis Cleghorn, manager of the Pirates, remarked, the open play allowed under Coast rules produces some sloppy hockey, but it makes for lots of action, and that is what the cash customers demand."

RUTH IS SLOW GETTING STARTED

St. Petersburg, where the New York Yankees are doing their Spring training this year, is asking when "Babe" Ruth, sultan of swat, is going to hit a homer at Waterfront Park. The big bambino has not smacked out a homer at St. Petersburg park since 1927. The truth of the matter is that Ruth is a slow starter, especially in the home-run business. He usually breaks out in a rash of home runs on the barnstorming jaunt-home through the Tennessee and Carolina "sticks," but seldom gets any in the early training games. Ruth's failure to hit better in the early games usually is due to blisters on his hands. He grips his bat so tightly in the early batting practice that a week later the palm of his hand is almost raw. It is not until he gets it well calloused that he starts to hit. Usually the season is well under way before the bambino starts hitting home runs with any degree of regularity.

LESTER PATRICK IS CONGRATULATED

Following the victory of the New York Rangers over the Detroit Maple Leafs in the N.H.L. play-offs a number of prominent Victoria business men and personal friends of the Victorian dispatched telegrams extending their congratulations to one of the world's greatest hockey instructors. Hundreds of Lester's friends not only in Victoria but all over the Dominion are pleased with his success as pilot of the Rangers.

TENNIS STAR TO PLAY BASEBALL

George Lott, Chicago tennis star, who ranks third in the United States list, plans to participate in both tennis and baseball this summer. He will captain the University of Chicago team and will also play for his college baseball nine. In his "prep" school days he was an exceptional pitcher. He has been working indoors with the Chicago "U" battery men and will be ready to take his place on the line-up. Lott is also a hard hitter and may be used in the outfield on this account.

ALL-STAR N.H.L. TEAM SELECTED

Ten managers of the National Hockey teams were asked recently to select an all-star team, but no manager was allowed to select a player from his own team. "King" Clancy, dashing Ottawa defence player, received the greatest number of votes of any player selected. Out of a possible nine votes he received eight.

The team selected follows: Roy Worters, New York Americans for goal; "King" Clancy, Ottawa, and Eddie Shore, Boston, for the defence positions; "Howie" Morenz, of the Montreal Canadiens, for centre; Aurel Joliat, of the Canadiens, for left wing and "Ace" Bailey, of Toronto, for right wing.

INTERNATIONAL COMPETITION FOR WOMEN GOLFERS

The women golfers of the United States will take part in an international competition with women golfers of Great Britain, France and Canada some time within the next two years, if present plans are realized. A committee recently was appointed by Mrs. David Gaut, acting as chairman of the Women's Committee of the United States Golf Association, to confer with the officers of the national golf body as to the feasibility of working out such a series. Among women golfers in general the proposed plan has met with approval. They are desirous of establishing a series within their own ranks to correspond to the Walker Cup matches in men's golf. There is a possibility this season, since several leading players, including Miss Glenna Collet, national champion; Miss Marion Hollins, Miss Helen Hicks and Miss Maureen O'Neill, are contemplating the trip to the British women's championship, a programme of informal matches probably will be arranged with representatives of the other countries at St. Andrews. It was in this way that the Walker Cup series began, and it is quite likely to be the method of getting this competition under way among the women. Miss Margaret Curtis, former national champion, and her sister, Miss Harriet Curtis, already have offered a suitable trophy. The French players have expressed their willingness to co-operate in the inauguration of the matches, and although the Ladies' Golf Union of Great Britain has taken no action officially on the matter, it is believed they are waiting for the suggestion to be authorized by the U.S.G.A. before doing so. The women seniors of Canada now have a series with the women seniors of the United States, and the Dominion players in individual instances have already signified their intention of co-operating in the establishment of the proposed matches. The success of the movement will depend on what action the U.S.G.A. takes on the matter.

Seek Entries For Junior Soccer Cup Series at Meeting

Entries for the Lower Island Junior Soccer Championship competition, open to all junior clubs, will be received at a meeting of the Lower Island Junior Football Association in the Y.M.C.A. to-morrow at 8 p.m. The series will be played on the knockout system and the winners of Victoria district will meet the winners of the Nanaimo Section in the Island finals at Duncan.

BORDER RULING FAVORS WORKERS

Washington, April 2 (By Francis G. Aidham, Staff Correspondent of the Canadian Press).—The right of United States contractors to employ Canadians on this side of the line was upheld yesterday in the decision of the Immigration board of review in the St. Johnsbury case.

For months the Department of Immigration had had under review the charge that a construction company just this side of the Canadian border had conspired to break the United States alien contract labor clause when it employed more than 100 Canadians on the building of a new dam in the Connecticut River. About forty Canadian workmen were taken into custody and were released on bonds pending an investigation.

Yesterday the board of review found the deportation proceedings should be dropped for lack of evidence of conspiracy to break the alien contract labor law.

A number of men accused last the United States of their own accord. Most of them, however, remained to fight their case. Their right to cross the border and seek work is established in yesterday's decision.

CANADA'S HISTORIC SITES

Canada's historical background contains some of the most romantic and interesting episodes in the history of North America. In many districts throughout the Dominion there still remain visible evidences of our history in ruins which have been preserved but there are scenes of other and often important actions and events which are unmarked by any special reminder of what transpired at these points. The Department of the Interior has been carrying on a valuable work in preserving and restoring the ruins and suitably making the sites of national historic importance.

Your food
doesn't do you any good
if you're tired

Tired, strained nerves interfere with digestion. At the end of the day's work, it is a good rule to relieve nervous tension before eating—by the use of Wrigley's. Your doctor will tell you how the act of chewing relaxes and soothes the tired nerves—how the healthful cleansing action of Wrigley's refreshes and tones you up all round—so that you're ready to enjoy your food.

Wrigley's also helps digestion after meals, by stimulating the flow of natural juices. In addition, it cleanses the teeth, removes all traces of eating or smoking—and sweetens the breath.

What other sweet cost so little and does so much?

"LOVE IS OF THE VALLEY"

By
DAVID LYALL

"Ay, fine, we had to come out before the end, I saw the mistress and Miss Ida there."

"What?" Beatrice started back, much shocked.

"I think you must have made a mistake, Lizzie."

"Nae fear, they was in the third row, and the mistress had on her hat with the red feather," said Lizzie with evident enjoyment of the sensation she was creating.

"We needn't expect them for some time then. Just see that the kettle is left on the hob and put a bit more coal on, Lizzie. Then, when you've had your supper, slip up quietly to your bed, so as not to disturb the master."

"Is he no weel?" asked Lizzie sympathetically.

"He has had a very tiring day, but I hope he is going to have a good night." Beatrice did not wait for the late-comers. Leaving a supper tray for them on the dining-room table, she went up to her own bed about half-past ten, first tip-toeing into her father's room to see how he fared. The sound of his long, low, regular breathing filled the room, and as Beatrice brushed out the long waves of her beautiful hair, she thanked God for the merciful benediction of sleep.

By eleven she, too, fell on sleep, and did not hear the revellers come in. It seemed as if she had quite a long, dreamless, restful night, when she was awakened by someone tugging at her shoulder, and her stepmother's agitated voice in her ear.

"Beel! Beel! Come quick! I can't awaken your father. There's something wrong with him!"

Beatrice sprang up. The lighted candle Lotta held in her hand revealed the ungainly figure in an ugly plain dressing gown, shivering in the middle of the narrow floor. The extreme rawness of the air proclaimed the edge of dawn. They hurried down the steep stair and entered the room, where the gas was turned full on. The regular breathing which Beatrice had noted so often as a child, had certainly ceased. A peace that was absolute rested in a kind of majesty on Walter Heron's face, restoring at once its beauty and its youth. Beatrice laid her hand on his heart, ran for the hand mirror to lay against his lips, then fell upon her knees sobbing, while Lotta's huddled figure expressed absolute terror. "He is dead," Beatrice said, then, after a mo-

ment, added, not knowing whence came the words, "It is better to fall into the hands of the living God than into the hands of men!"

CHAPTER V

Walter Heron had died a perfectly natural death. The rumors which circulated through the city, and they were many, were entirely unfounded.

The dead man had shrunk, with all the shrinking of rather a fine, sensitive, highly-strung nature, from the terrible debacle of his life and hopes, but he was incapable of seeking the way out which his partner had deliberately chosen. The keenest, fullest inquiry was made, no stone left unturned, but nothing could upset the medical evidence to the effect that Heron had died in his sleep, gutted of drugs or other aids to quick dispatch, simply because his heart had been unable to stand the frightful shock and strain of events. But while this verdict had to be accepted, and no proceedings could now be taken against the firm that had brought distress on many innocent persons, the name of Heron fell from its high estate in Edinburgh circles. The affair made the usual nine days' wonder, and then was forgotten in the swift revolution of other affairs. No one attended save the minister and the doctor, who had been his personal friends.

One morning coach held them, following the hearse which bore all that was mortal of Walter Heron to his last rest among his kindred in a corner of the policies of Linlithgow.

There was a little burying-ground there, and Beatrice had been intensely relieved to hear Compton Brodie had not been buried within its precincts. She could not have prevented it, but they had not done it. He had been buried in a Lanarkshire cemetery, at a place which he had some connection in his youth. Afterwards she learned that he had left some sort of directions to this effect.

The little cortege moved away from "The Outlook" about one o'clock on a grey, still day. All the blinds at the neighboring windows were decently drawn, a token of respect for which Beatrice felt a passionate touch of gratitude. Directly the coaches came to the door Beatrice flew up and put a coat over her black dress. It was not usual for women to attend funerals,

but she felt she could not allow her father to go unattended out to Linlithgow. She took Lotta's place, that was all.

The others did not realize what she was doing till they saw her stepping into the mourning coach beside the minister and the doctor.

They stared at one another, and Lotta said in a queer, soft voice: "What will be do next, Ida? She seems a little queer in the head, don't you think?"

Mr. Grier, the minister of their parish, when he saw Beatrice seated and hatted, sprang out to open the door for her.

"You think you'll go, Miss Heron?" he inquired—it was necessary. "It would—it would be very lonely for him."

Grier, a man of forty-five, struggling in a working-class parish, with small means, and a large family, was profoundly moved. He had been intending to discuss the situation with Doctor Hyslop on the way out, but this was rendered impossible by Miss Heron's presence.

Talk was necessarily spasmodic and restricted, and all were glad when the pace could be quickened as the busier streets were left behind.

The hills were looking very beautiful that soft February day; delicate mists floated here and there in the little valleys, creating the most dreamlike and exquisite effects. Once or twice the sun, struggling through, revealed glimpses of unimagined glory.

They had to enter by the front gates, there being no other way of reaching the little Glade acre at the far edge of the park. Beatrice was glad to find them wide open, the lodgekeeper ready with her courtesy and her sympathetic greeting. They were expected, of course. Permission had had to be asked from Mrs. Brodie, and it was Beatrice who had written about it. Lotta having absolutely refused to do it.

At the grave Beatrice was touched inexpressibly to find a handful of old folks from Marristown village, men who had known her father in the old days, and remembered his gracious, kindly ways, men who had poignantly regretted the passing of the old name and race from Linlithgow. She shook hands silently with each other, the little party decently composed, though not what a tremendous appeal she made to every man's heart there. She could not mourn; nay, rather she felt a sense of peace which she could not have explained.

Her father was safe, far away where none could touch him, and, further, he had rejoined her from whom his true spirit and heart had never been separated. Of that she was completely sure, and it comforted her even more than the words of the beautiful committal service which Mr. Grier spoke so reverently and with so much feeling. When all was over Beatrice stepped up to the two who had brought her, "You won't mind if I don't ride back with you? I want to go up to the house to see Mrs. Brodie."

Colwood

Miss H. G. Kelly is attending, during Easter week, a course in public health at the University of British Columbia. During her absence calls will be answered at Belmont 18.

At the home of her parents, Mr. and Mrs. J. Hopwood, "Rosebank," Miss Marjorie Hopwood entertained Saturday evening at an informal dance in honor of Mrs. Hopwood's Easter house guest, Ewart Whelley of Vancouver. A novel guessing contest was a feature of the evening's entertainment. Daffodils, in keeping with the season, made an effective floral decoration in the parlour, where dancing was enjoyed. Later in the evening a buffet supper was served. The guests included the Misses Jean and Adria Murray, Rita Martin, Daisy Carter, Vada Rowe, and Messrs. Alec Murray, Ewart Whelley, Pat Munro, John Southwell and Jack Denton.

W. Moore has returned to Vancouver after visiting Mr. and Mrs. G. M. Percy.

R. Watson of Vancouver spent the Easter holidays with Mr. and Mrs. E. C. Mesher, "Hyde Park."

H. S. Meadows of Vernon spent the Easter holidays with his family at Colwood.

The Weekly Card Players will meet Wednesday evening, April 3, at the home of Mrs. R. B. Murray, Albert Head Road. As the season is drawing to a close, it is hoped there will be a good turn-out of the members to enjoy the hospitality of Mrs. Murray.

The Women's Auxiliary of St. John's Church and the church committee will hold their postponed five hundred and bridge in Colwood Hall on Wednesday evening, April 10, at 8 o'clock sharp. The hearty co-operation of the district is hoped for to ensure the success of this social evening.

Sooke

Mrs. George Troup has been a recent visitor in Victoria, returning with Mrs. R. McMillan as her guest.

Miss Peggy Fisher and Jack Fisher have returned home for the Easter vacation.

Mrs. Snape, Miss Snape and Dick Snape are spending a few days at their Sooke home.

Ned Lee Warner has been visiting his parents.

Ronald Kitching is at home for the Easter holidays.

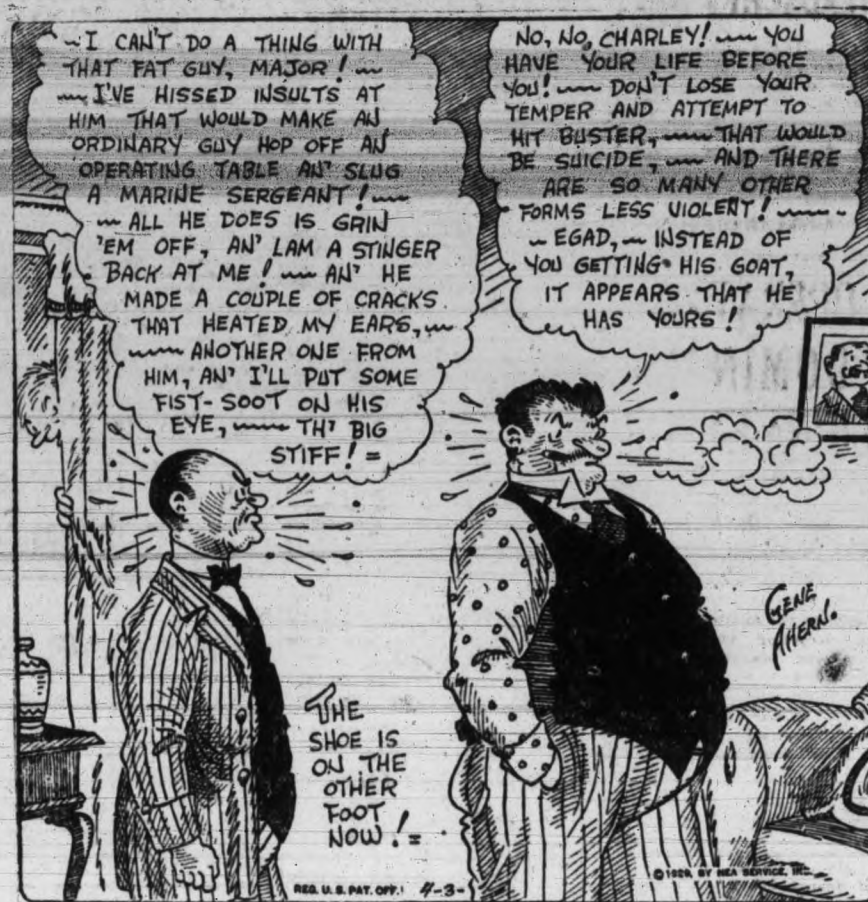

Grace Greenwood tells a hilarious story of a parrot which belonged to William H. Seward, famous as belonging to the war cabinet of Abraham Lincoln.

This parrot used to take part in political discussions with Seward, entering into the debate with such good spirit that it would try to scream him down.

It had a prodigious liking for its master. Its sympathy for him was so extreme that when he began to develop a cough it would quickly show symptoms of bronchitis.

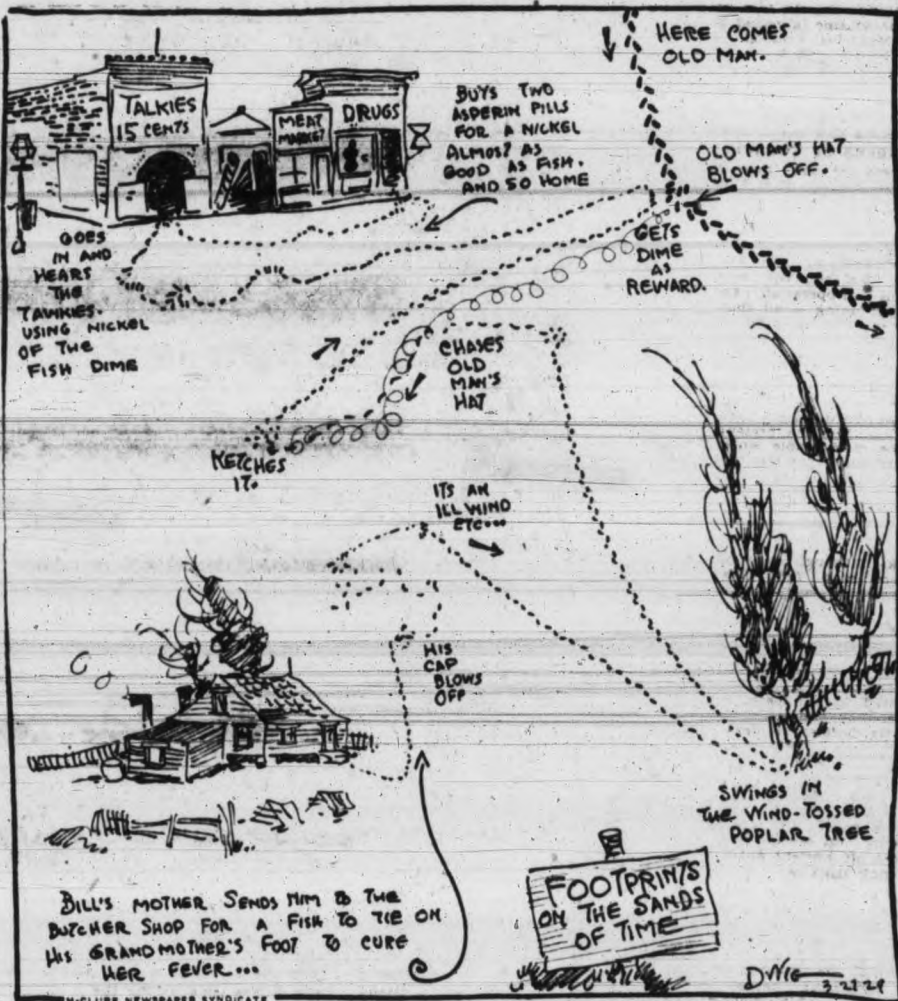

These were real and not affected.

Metchosin

The regular meeting of the Women's Auxiliary to St. Mary's Church was held on Thursday at the home of Miss Blyth. There was a very good attendance, and Mrs. A. Cann, Dorcas secretary, distributed clothing among the members to be made for the usual sale for the Indians. The members decided to provide the \$10 necessary for the boots. Afternoon tea was served by the hostess. The next meeting will be held at the home of Mrs. F. A. Pearce when Mrs. Blyth, by request will read the interesting paper on India which she gave at the annual meeting of the Columbia W.A.

On Good Friday evening the Bishop of Columbia held an impressive confirmation service at St. Mary's Church when nine candidates from Metchosin and William Head Quarantine Station were confirmed. A large congregation was present to participate in the service.

The annual meeting of the Metchosin Conservative Association was held in the Metchosin Hall on Thursday evening last. The officers elected for the ensuing year were: President,

W. O. Sweetman; vice-president, Dr. T. Gaddes; secretary-treasurer, Frank F. Frudd; directors, G. F. Weir and F. A. Pearce. Six new members joined the association.

Luxton

Messrs. William and Arthur Morson and Douglas Smith motored down from Courtenay and were week-end guests of Mr. and Mrs. C. Smith. Mrs. A. Hankin and son, Wilfrid, have returned from a short holiday in Victoria, where they were the guests of Mrs. Hankin's sister, Miss V. M. Dyer.

Miss Marjorie Knowles is enjoying the Easter holidays as the guest of Mrs. Thomas Madders, Glen Lake Road. Mr. and Mrs. Richard Meadows and children of Victoria were visitors at Easter of Mr. and Mrs. A. Page.

Mrs. A. Hankin will have as her guest during Easter week Miss Ethel O'Connor of Victoria.

Considerable activity was in evidence at Glen Lake over the week-end, many of the cottagers taking advantage of the Easter holidays to open up their summer homes.

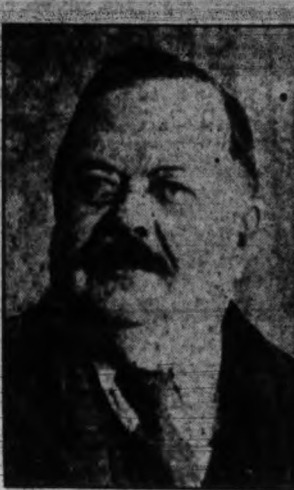

Wolfe Monument in England Will Realize Ambition of Late B.C. Agent-General

British Columbia may take personal pride in the monument to General Wolfe which is to be erected in England through the generosity of Canadians, for its erection will be the long-delayed response to the devotion with which the late F. C. Wade, K.C., former Agent-General for British Columbia in London, strove to have the memory of Wolfe fittingly and honorably perpetuated in his own country.

Two monuments have been erected to Wolfe in Canada, both in Quebec. One, of course, is the tall column on the battlefield of the Plains of Abraham, which records how "Here Wolfe died, victorious, on the 13th of September, 1759." The other is less well known. It stands jointly to the memory of "Wolfe and Montcalm" in the garden of Government House at Quebec. Its inscription reads: "Mortem virtutis communem, famam historiam, monumentum posteritas dedit," which may be translated, "Heroism gave them a common death, history a common glory, and posterity a monument."

IN HOME OF HIS YOUTH

The monument that Canadian positively is now about to erect to Wolfe in England is to be set amid scenes he must have loved dearly. He was born at Westerham, in Kent, but while he was still very young, his parents moved their home to Macarney House, at Greenwich, which remained his home during his life. He went to school near there. He spent his youth there. He proceeded from there, with his father, to campaigns in Europe, and returned there from other active service to recuperate a health that always was uncertain. He returned there from the distinguished service he performed as a brigadier-general at Louisbourg, and from there, his home, he set out, on

THE LATE F. C. WADE, K.C.

June 1, 1759, in command of the expedition that captured Quebec, to be laid, dead, alongside the very gallant Montcalm, who met death an hour or there. He spent his youth there. He proceeded from there, with his father, to campaigns in Europe, and returned there from other active service to recuperate a health that always was uncertain. He returned there from the distinguished service he performed as a brigadier-general at Louisbourg, and from there, his home, he set out, on

Royal Observatory, where "the time comes from," the new monument will stand poised on a pedestal, bringing the total height to twenty-seven feet. Wolfe will gaze upon the shipping that glides on the Thames, looking as he gazed across the St. Lawrence, the night before he scaled the heights of Quebec.

CANADIAN SCULPTOR

The Canadian sculptor, R. Tait McKenzie, has cast a figure in bronze that is only ten feet high, but the genius which has transfused intense concentration of thought behind this youthful—brave—little, male figure statue of Wolfe famous. The reflective mood at once captures the attention. The loosely clothed figure, merely reveals the body of the man lost in contemplation. The trappings so universal in military statues are missing. To look upon the face of the young commander—and it has to be recalled that Major-General Wolfe was only thirty-two when he died the day after the incident commemorated in this statue—to look upon his face is to wonder what he is seeing, what he is thinking. The sculptor's inspiration has chosen a pregnant moment. He catches Wolfe standing on the south side of the St. Lawrence, reconnoitering the plans for the morning's battle prepared by his brigadiers. Francis Parkman tells how these plans designed the attack by the British to remove his remnants from the defence of the path that ran up the face of the heights. The French governor scoffed at the notion for thinking the "English have wings." Wolfe, looking through his telescope, sees the remnants being withdrawn and wonders, as Montcalm wondered, if the English had not wings. The sculptor shows him in this statue in the deep aberration of thought. It is the moment before he rejects all the plans of his brigadiers, and decides on the order of battle, and decides on scaling the heights to the Plains of Abraham that night.

MEMORIALS WIN FAME

Dr. McKenzie is a Canadian by birth, and was on the faculty of McGill University before he went to the University of Pennsylvania. His war memorials have brought him a very fine reputation. One in Edinburgh, commemorating the Scottish soldiers, ranks almost with the Scott memorial. His "Home Coming" at Cambridge is classic. His work in connection with the war memorial at Ottawa is nationally famous. He has never before achieved anything so dignified, "bold in its simplicity," as The London Times says, as the Wolfe monument. It is a beautiful fulfillment to the wish expressed by Fred Wade a quarter-century ago. When he was engaged in the Alaska boundary case in London in 1903, he walked in Greenwich Park, and went into St. Alfege's Church. Wolfe's untimely death was there, but there was no memorial. Wade was seized of the idea of Canada building some such memorial, and never desisted in the pursuit of his wish. He launched it first formally at a meeting of the Winnipeg Canadian club on July 19, 1906. A little more than three years later he reported the progress he had made at a joint meeting of the Canadian clubs of Vancouver. In a private letter, dated April 22, 1911, and received in Winnipeg, he wrote: "After giving addresses year after year I found that the only way to raise money for a memorial is to go out on the street and ask for subscriptions. This I have done with most gratifying results. The \$8,000 mark has been reached, and you will be astonished to see how generously Vancouver has subscribed—three persons \$500 each, twenty-five persons \$100 each, seventeen persons \$50 each, twenty-three persons \$25 each, besides many smaller amounts."

PROMOTED SCHEME

The Manitoba Free Press says that Wade was forgivingly lent by friends to be obsessed by the Wolfe memorial. He promoted it in the hope that he went, in every club of which he was a member, with every person who could either with money or influence help on the attainment of a state memorial. This I have done with most gratifying results. The \$8,000 mark has been reached, and you will be astonished to see how generously Vancouver has subscribed—three persons \$500 each, twenty-five persons \$100 each, seventeen persons \$50 each, twenty-three persons \$25 each, besides many smaller amounts."

Keating

The fifteenth anniversary of the South Saanich Women's Institute was celebrated in the Temperance Hall on Saturday evening with a card party and social. Twelve tables competed in the card game. First honors went to Mrs. Mosher, Mrs. Syvan and Ralph and Gordon Michell, with thirty-one discs. Mrs. Fred Michell and Messrs. Fred Michell, T. Peden and T. Glendon, with twenty-four discs, captured second prize. Consolation prize went to Mrs. McKenzie, Miss Alice Syvan, Mrs. T. Glendon and W. Butler Sr. Following cards an Easter treasure hunt was held. Mrs. T. Peden, Miss M. Michell and Gordon Michell being winners of the Easter novelties. Dainty refreshments were served by Messdames Wood, Glendon, Beaumont and Howe.

Mr. and Mrs. Thomas G. Michell, Island View Road, are receiving congratulations on the birth of a son at St. Joseph's Hospital March 27.

Mrs. Scott and two children of Vancouver spent Easter at the home of Mr. and Mrs. A. Gale, Stelly's Cross-road.

Misses E. and V. Greenshaw of Vancouver spent the week-end visiting at the home of Mr. and Mrs. C. L. Syvan. They were accompanied to Vancouver by Miss Nellie Syvan, who will spend Easter week there.

Mr. and Mrs. Collings and daughter from the prairies are spending several days visiting Mr. Collings' law and sister, Mr. and Mrs. Howe, near Saanichton.

Master Walter Priker is spending the Easter holiday with his grandmother, Mrs. Hofer, Central Saanich Road. William Turgoose has returned to Premier Mines after spending the last ten days at the home of his parents, Mr. and Mrs. P. Turgoose of Saanichton.

Mrs. Turgoose is spending a few days visiting friends in Seattle.

Thousands have made the tire cord test

be a scientist for ten minutes where you see one of these signs

An interesting and profitable experiment awaits you at your Goodyear Dealer's. He has an ingenious machine for testing tire cords, which he wants you to try. This machine, operated by yourself, will demonstrate, indisputably, the superiority of Supertwist cord, used in Goodyear Tires, over ordinary tire cord. Drop in today where you see one of the Goodyear Selected Dealer Signs shown here.

Rough Roads or Paved Highways What Happens Inside Your Tires?

You are driving along, when suddenly your car thuds into a hole in the road. What happens inside your tires?

Nothing is likely to happen—if your tires are Goodyear Tires, made with Supertwist. The extra elasticity of this Goodyear-developed tire cord allows it to stretch under such impacts and recover, like a rubber band. It enables Goodyear Tires to withstand the constant flexing that is experienced every mile you drive.

Under the heat and strain of every-day driving, ordinary tire cord becomes fatigued and loses its strength.

But the tire cord test shows this superiority of Supertwist—shows it so clearly that even a child can see the difference—see why the Goodyear Balloon is called "the world's greatest tire."

Below is the machine on which you may make the tire cord test at your Goodyear Dealer's. Prove for yourself how, after a tension that leaves the ordinary cord lifeless, Supertwist keeps its life and spring, and how Supertwist has greater stretch than ordinary cord.

Henry Ford Established With Majority Control of Ford Company of Canada

Windsor, April 2—Control of the Ford Motor Company of Canada no longer rests with Canadian interests. Henry Ford and his associates have definitely established themselves with a majority vote in the affairs of the company.

At the meeting here there were fifty-seven shareholders present, representing 11,316 shares of stock, and 1,442 shareholders having 36,593 shares were represented by proxy. A total of 47,909 shares were represented. There are 70,000 shares outstanding.

When the Ford Motor Company of Canada Limited was formed in 1904, an agreement was reached with Henry Ford. In return for patent rights and the active co-operation both of Mr. Ford and his associates in the Michigan and the exclusive rights to sell Ford cars in all parts of the British Empire except Great Britain and Ireland, the Canadian company allotted to Mr. Ford and his associates in the Michigan Company fifty-one per cent of the stock and also agreed that he should have the nomination of three of the directors of the company.

A peculiar condition, however, has come about respecting Mr. Ford's associates in the Michigan company since the formation of the Canadian company in 1904. Then Mr. Ford owned some twenty-five per cent of the Michigan company and he and his associates owned fifty-one per cent of the Canadian company.

Mr. Ford and his family have since acquired 100 per cent ownership of the Michigan shares. Mr. Ford did not buy up the Canadian shares of all his former associates. The result has been Mr. Ford and his family now own some thirty per cent of Canadian Ford stock, instead of fifty-one per cent of the 70,000 issued voting shares. The remaining twenty-five per cent of the stock once owned by the associates of Mr. Ford has been scattered to various owners through the medium of sales on different exchanges.

Although not likely to happen, it had become a mathematical possibility for shareholders opposed to Mr. Ford to start a movement by which they would gain control of the company. Had they so decided, there was the possibility of the shareholders naming to the board of directors three men to whom Mr. Ford might be opposed.

WOULD BE COMPETITORS

In that event, Mr. Ford would have had the right to say the agreement between the Michigan and Canadian Fords had been broken by the shareholders and, hence, the Canadian and Michigan Ford companies would be competitors instead of co-operators. The position of the Canadian Ford in active competition with the Michigan Ford would be impossible for the Canadian Ford.

Under the twenty for one stock split

there are nineteen non-voting class A shares in each twenty, and one voting class B share. Hence there are still the same number of votes as before the split.

There are now 2,000,000 shares. Of these, 1,900,000 are non-voting class A, and 100,000 are voting class B. Of these 100,000 voting shares, Mr. Ford and his family own some 21,000. There are 30,000 in the treasury of the company. The other 49,000 are outstanding.

It is proposed by the directors to form a voting trust which will hold this stock. Voting trust certificates will be issued against these shares at the discretion of the directors, and at a price of \$25 a share. Although the stock will actually remain with the voting trust, the voting certificates may be sold to individuals.

The voting trusts will be made up of three individuals. One of these will be named by Mr. Ford. A second will be appointed by the holders of the certificates. The third will be chosen by the nomination of three of the directors of the company.

In disposing of these certificates, the directors intend to issue the voting certificates only to those who are in agreement with Mr. Ford, and who are prepared to place their votes behind the policies he will dictate for the company.

ASSURED 51,000 VOTES

In this way 51,000 votes are assured Mr. Ford in a meeting of the shareholders. As there can be only 100,000 votes all told, Mr. Ford has thus secured a majority to control the affairs of the company.

One shareholder from the United States raised the objection yesterday that it is unfair to the American shareholders to allow the Canadian people the privilege of buying these 100,000 shares at \$30 each. He feared the purchasers would simply throw their stock in the open market and bring down the price of all shares.

Two others opposed the stock split on the same ground. Their objection was not to the twenty for one idea but to the plan to allow Canadians to buy at \$30 a share. None of the three asked for a poll vote.

Subscription blanks for 100,000 shares of Class A, non-voting stock of the Ford Motor Company of Canada Limited, to be offered to the Canadian public at \$30 a share will be available immediately, Mr. Campbell, newly-elected treasurer of the company, stated today.

The subscription books will be opened for five hours on Thursday, April 4, 1929, or from 10 a. m. to 3 p. m. of that day. The stock is being offered by the company through the Canadian General Securities Limited, whose head office is in Toronto. Full particulars governing application for the new issue will be stated in announcements by the company.

Stock Market Crash Costs Toronto Over \$10,000,000;

Toronto, April 2—Estimates of stock exchange authorities put the loss sustained by Toronto speculators yesterday on the mining market, the New York market and the Toronto exchange at approximately \$10,000,000 as a result of the sympathetic decline occasioned here by the tumble of prices on the New York exchange following the advance in the price of call money.

"The stock market wiped out hundreds of Toronto people and thousands of people throughout the province," declared one of the largest brokers in the city whose business is largely with the speculative rather than the investment community. "It may be that the loss in profits which have accumulated to Toronto people will average \$10,000,000 and the loss throughout Ontario will easily reach \$25,000,000."

"But does this represent a loss of initial investment?" he was asked. "No," he answered. "I would say that it comprises the loss of investment plus the profits that have been accumulated during the recent bull market. The original investment would probably be between \$3,000,000 and \$8,000,000."

"Although it did not affect as many people, perhaps, it was a catastrophe comparable in many respects with a bank failure. The Canadian markets were affected more in a sympathetic sense. The selling movement owes its origin to the abrupt rise in the price of New York call money."

FAMILY SKELETONS UNCOVERED

"It has been a nightmare," the office manager of one brokerage house confided. "I didn't know there were so many family skeletons in the city. Customers have been revealing their troubles to me, and some of them, whom I believed to be fairly prosperous, have shown that they have been playing the market on a shoestring."

A number of women were present in some of the board rooms and expressed joy over the somewhat more steady tone evident early today.

"I lost \$230 yesterday," a young woman told a trader whose acquaintance she had made in the office of her broker, "but my husband helped me out and loaned me the money to protect my account and I hope to be able to break even to-day."

"You are luckier than I was," replied the man. "I had to let go some of the things I am sure are going to make good right away."

Brokers generally were reticent in revealing to what extent their clients had been hit by the tumble in prices, but the appearance of brokerage offices suggested that those clobbering in the New York list suffered more severely than those who held Canadian stocks.

BOTTOM REACHED IN MINES

The opinion generally voiced in mining circles is that the bottom has been reached so far as northern Ontario securities are concerned.

Arthur E. Moyses and Company, members of the Standard Exchange, issued a statement to the effect that the sharp reaction of last week "undoubtedly reached such proportions that the accumulation of the better class of mining shares has become attractive. The statement goes on to point out that those familiar with the potential value of Ontario mining have been loath to make sacrifices with the result that forced liquidation on the mining market has been reduced with every effort being made to ride over the present market weakness."

SAYS WOMEN ARE WORST

At the Toronto Stock Exchange today the gallery was jammed with plungers watching the illuminated ticker tape.

For a considerable period after the opening, while bedlam reigned among the floor-traders, the only person who

seemed able to view the turmoil with calm and detachment was the door-man.

"The women are the worst," he said. "They come in here and ask me what they will do, as if I decided the trend of the market. Yesterday morning one lady came in and frantically told me that she had invested \$1,200 and wanted to know what to do about the falling market. She said she had a family and couldn't raise margins. I told her if she could get out and bear her loss, to do so. Just before the market closed she came in all smiles and thanked me as if I had been responsible for saving her a considerable sum."

At the Standard Exchange the rush is still on, but a spirit of optimism is again asserting itself. The consensus is that the worst is over.

A chic matron was not so confident that the market had reached bottom. "I'm taking my loss and getting out for the present," she said. "I brought Nickel when it was fifty-two and had about \$7,000 in paper profits when it touched the seventies. Right now I've taken a \$3,000 loss, and it's all I want for now." She wrote out her "sell" order in a hand which was suspiciously shaky. She seemed a little pleased when the clerk's quotation showed a drop. "See, I told you so," was her parting remark.

Many stormy and some pitiful interviews occurred between brokers and their clients. One woman who lost about \$700 was an early caller at the office of a Toronto broker. With tears in her eyes she besought him to hold her securities until she would be able to obtain a loan by wire from her sister in Sacramento, Calif. "It will be at my risk," he finally conceded, "but I will hold out until noon if you are sure you will get the money."

SAYS SITUATION HEALTHY

The New York market has temporarily pulled itself out. The situation is healthy, but brokers can carry stock too high," said a leading official of the Canadian Bank of Commerce today. "Brokers in New York have been warned a number of times by the Federal Reserve Board that they were borrowing too high. Having given the warning the Federal Reserve may now be satisfied. Brokers have just invited this for some time."

"Stocks will come down to a point where the public will think them a good buy. There is a possibility that they will go too low, but nobody really knows what is going to happen. It is thought that this is the worst crash on the New York market. It is available speaking when compared with the crashes of 1906 and 1907, when there was not so much money in the North American continent."

"This, of course, does not affect the Canadian banks at all. Canadian banks years ago warned brokers that there was too much speculation. When a situation arises here such as has arisen in New York we just close down and refuse to lend money on stock."

One well-informed Toronto expert is of the opinion that the market slump did not originate in New York, as is generally stated, but in Chicago, where the banks refused to carry even the sounder stocks unless margined to fifty per cent. In many instances they refused to carry them at all.

At \$6.85, Hollinger gold mine touched its lowest mark since 1921. The drop has materially reduced the immediate fortunes of some of Toronto's wealthiest people. A comparatively small group of millionaires have held the bulk of Hollinger stock since the days of the first real development and not many months ago the stock stood as high as \$18 to \$30 a share. The present low level means that the realizable values of these large holdings are now reduced by two-thirds though, of course, actual dividend rates have not been affected.

CANADIAN ISSUE

We Offer on Behalf of the Company

100,000 Class "A" Shares

Ford Motor Company of Canada
LIMITED

CAPITALIZATION { CLASS "A" STOCK, NO PAR VALUE (NON-VOTING)
CLASS "B" STOCK, NO PAR VALUE (VOTING)

The shares of Class "A" stock and of Class "B" stock are alike in all respects except in the matter of voting, and with the provision that each share of Class "B" stock may be exchanged for one share of Class "A" stock at the holder's option, in compliance with which provision 100,000 shares of Class "A" stock shall be reserved. Each share of Class "D" stock shall carry the right to one vote at any and all meetings of the Company. The shares of Class "A" stock shall carry no right to vote provided, however, that should the number of shares of Class "B" stock outstanding at any time fall below 20,000 all shares thereafter shall have equal voting rights.

Detroit—Guardian Trust Company of Detroit

EDSEL B. FORD, Chairman of the Board
GEO. E. DICKERT, First Vice-President
W. R. CAMPBELL, President and Treasurer, has submitted the following information

OFFICERS AND DIRECTORS

HENRY FORD, Director
WALLACE R. CAMPBELL, President and Treasurer
P. E. MARTIN, Second Vice-President

HISTORY

Ford Motor Company of Canada, Limited was incorporated under the laws of the Dominion of Canada in 1911 with a capital of \$1,000,000.00, for the purpose of taking over a Company of the same name incorporated under the laws of the Province of Ontario in 1904 with a capital of \$125,000.00. In December, 1915, the capital of the Company was increased to \$10,000,000.00 of which \$7,000,000.00 was issued. In 1929 the shares were converted into no par value stock, each share of \$100.00 par value whether issued or unissued being converted into 19 shares of Class "A" stock and one share of Class "B" stock. The right to purchase two additional shares of Class "A" stock has been accorded the holder of each share of old stock of \$100.00 par value outstanding immediately prior to such conversion. Each original share in the old Ontario Company by reason of stock dividends and conversion is now represented by 120 shares of the present capital stock of the Company, (1064 "A" and 56 "B"). The Company has no funded debt, or no securities ranking in priority to the shares now issued. The Company holds a contract with Henry Ford and Ford Motor Company of Detroit, dated the 10th day of August, 1904, whereby it obtains the benefit of his and its patents and inventions. Production at the present time averages in excess of 600 motor units per day, which constitutes a record in the history of the Company's operations.

FIELD OF OPERATION

Ford Motor Company of Canada, Limited has exclusive manufacturing and selling rights of Ford automobiles and trucks throughout the British Empire, with the exception of Great Britain and Ireland. The Company's Head Office and Factories are located at Ford City, Ontario; Factories cover a ground floor space of 48 acres, and the Company gives employment at the present time to 8800 men. Branches are maintained at St. John, Montreal, Toronto, London, Winnipeg, Regina, Calgary, and Vancouver. The Company owns all the issued Capital other than Directors' qualifying shares of the following affiliated Companies:

FORD MOTOR COMPANY OF MALAYA, LIMITED **FORD MOTOR COMPANY OF SOUTH AFRICA, LIMITED** **FORD MOTOR COMPANY OF INDIA, LIMITED**
FORD MOTOR COMPANY OF AUSTRALIA (PTY), LIMITED **FORD MANUFACTURING COMPANY OF AUSTRALIA (PTY), LIMITED**

Messrs. Clarkson, Gordon, Dilworth, Guilfoyle & Nash of Toronto, the Company's Auditors, certify the following Balance Sheet as of December 31st, 1928, after giving effect to (a) the conversion of the old shares into shares of no par value on the basis of twenty new shares for each old share, (b) the sale of 30,000 "B" shares and 370,000 "A" shares, and deducting all fees and expenses in connection with the issue and sale of these shares and the re-adjustment of the Company's capital structure. They also certify the earnings as shown below:

We certify that we have audited the books and accounts of Ford Motor Company of Canada, Limited for the six years ending 31st December, 1928 and have obtained all the information and explanations that we have required. In our opinion the above Balance Sheet has been properly prepared and the position of the Company as at 31st December, 1928, after giving effect to the conversion of the present shares and the new financing. We certify that the Profits (or Losses) of Ford Motor Company of Canada, Limited for the six years ending 31st December, 1928 were as follows:

	Before providing for Depreciation and Income Taxes	Depreciation	Provision for Income Tax at Present rates	Net after all charges
Year ending 31st December, 1921 Profit.....	\$5,733,709.63	\$ 729,015.79	\$400,215.44	\$4,604,478.40

Year ending 31st December, 1926 Profit.....	7,542,859.91	1,650,251.40	471,248.64	5,421,359.87
Year ending 31st December, 1927 Profit.....	1,954,234.90	1,920,365.55	2,549.55	31,319.80*
Year ending 31st December, 1928 Loss.....	2,584,245.97	1,999,241.77		4,583,487.74*

*These do not include Dividends received from Subsidiary Companies of \$144,950.00 in 1927 and \$1,182,836.21 in 1928.

CURRENT OPERATIONS

Production of Model T Automobiles and Trucks was suspended in May, 1927 and quantity production of Model A was not reached until late in the year 1928. After following the Company's usual policy of making full provision for the cost of tools, dies, etc. required for the production of Model A, and after setting up the regular depreciation on all the assets of the Company, operations for the year 1928 showed a loss of \$4,583,487.74 less dividends of \$1,182,836.21 received from Subsidiary Companies.

W. R. Campbell, President and Treasurer states that the operations for the months of January and February, 1929 according to statements prepared by the Company's own Accounts, show net profits after depreciation in excess of \$1,500,000. From present indications the

net profits for the month of March will be equally satisfactory. It is estimated that the net profits after depreciation for the year 1929 will be in excess of any previous year.

PURPOSE OF THIS ISSUE

This issue of 100,000 Class "A" shares is offered in Canada for the purpose of creating a larger number of Canadian Shareholders, and identifying an increasing number of Canadians with the interests of the Company.

DIVIDEND POLICY

It is the intention of the Directors to establish a regular quarterly or semi-annual dividend basis next year.

CANADIAN ISSUE

Ford Motor Company of Canada, Limited has stipulated under agreement with the undersigned and dated the 27th day of March, 1929, that these shares shall be offered for public subscription in all parts of Canada. In accordance therewith subscription books will be opened by Canadian General Securities, Limited, at their Head Office, 347 Bay Street, Toronto, Canada; at their Winnipeg Office, Trust and Loan Building, and in care of the banking institutions at the points hereinafter indicated on THURSDAY, APRIL 4TH, at 10:00 A. M., and will close on the same day at 3:00 P. M. Subscriptions from each Province will be receivable only at the places indicated as follows:

	Canadian Bank of Commerce, Main Office, Calgary.	Province of Nova Scotia.....	Royal Bank of Canada, Main Office, St. John
	Royal Bank of Canada, Main Office, Edmonton	Province of Prince Edward Island.....	Canadian Bank of Commerce, Main Office, Halifax
			Royal Bank of Canada, Main Office, Charlottetown

Terms of Subscription

All subscriptions must be in form similar to the application form appearing as part of this advertisement. Additional subscription forms may be obtained at any of the offices in Canada where subscriptions are receivable. All applications must be accompanied by a certified cheque payable at par to the Canadian General Securities Limited, for an amount equivalent to \$2.00 for each share applied for, the balance to be payable in Toronto funds on delivery of certificates following allotment. Allotment will be made as soon as possible following receipt of applications from all parts of Canada. The right is reserved to prorrate allotments by Province or otherwise, as the Directors of Ford Motor Company of Canada, Limited, may direct, and to reject in whole or in part any subscriptions. It is expected that interim certificates will be available for delivery on or about April 15th. All applications must be in writing. Telephone and telegraph orders will not be accepted. Applications must be made at the places indicated. It is the intention of the Company to make application to list the "A" shares on the Toronto, Montreal and Detroit Stock Exchanges, and the New York Curb Market.

The shares herein described are offered, if, as, and when issued, and subject to the approval of all legal details by Messrs. Oiler, Hanks & Harcourt, Toronto, and Messrs. Bartley, Bartley, Barnes, Aylesworth & McGladdery, Windsor, Ontario. Contracts herein referred to may be inspected at the Head Office of the Company during business hours until the close of the subscription list. A copy hereof has been filed with the Secretary of State of Canada.

READ THE STORY, THEN COLOR THE PICTURE

While Clowzy held the Goofygo, the old tub man exclaimed, "Well, you are quite the little brave young man. I thank you very much. Don't let that big bird get away. We'll make him help you in your play." "Oh, that's all right," said Clowzy. "What I did was not so much."

"I saw that he was hurting you, which was an unkind thing to do. That's why I dove and tackled him. He's safe and sound right now. But, I fear I can't hold him long. We'll have to find some rope and tie him to a tree somehow."

The other Tines then ran out, and greeted Clowzy with a shout. "Good work," cried Clowzy. "That was great. I must admit that you are braver than I thought you were. What funny things will occur. We'll gladly help you with the bird. Just tell us what to do."

"Quick! Get some rope," brave

Clowzy cried. "This Goofygo must now be tied. The rope was soon brought forth and Mister Bird was tied up tight. "That's what you get for punching me," the tub man said. "Now you can see that mean tricks never pay one. I am sure this serves you right."

"And then he said, 'Well, Tinymites, if you are out to see the sights, what say we build a cabin for a dandy little plane. When it is finished you'll all share a thrilling trip right through the air. It's better, far, than riding on a boat or choo-choo train."

"You'll find some wood near yonder tree. Please run and bring it all to me. I have a hammer and some nails. This ought to be real fun." The Tines ran. They didn't shirk and Mister Tub Man went to work. In just a little while he said, "This job will soon be done."

BEDTIME STORY

Uncle Wiggly's Swimming Boots

Copyright, 1929, by McClure Newspaper Syndicate
By HOWARD E. GARIS

"There!" exclaimed Uncle Wiggly as he hopped into his bungalow one afternoon when it was dark and cloudy. "Now let it rain all it wants to, and I think there will be plenty for this April. Let it rain!"

"Oh, Wiggly! Have you bought a new umbrella?" asked Mrs. Longears, who was out in the kitchen trying to see how Nurse Jane Fuzzy Wuzzy got the eggs out of their shell without breaking them.

"No, not exactly a new umbrella," answered the rabbit gentleman. "But I have bought myself a new pair of rubber boots to go swimming."

"Dear me! How silly!" squeaked Nurse Jane, coming in with a little dab of egg on the end of her nose. "How can you go swimming in rubber boots?"

"Oh, I didn't mean I would really wear my new boots when I went in swimming," said Uncle Wiggly. "But as it is very wet and showery in April, I mean to wear my boots over the fields and through the woods until I get to the swimming hole, and then I'll take them off."

"Oh, that's all right," said the muskrat lady housekeeper. "I thought it would be very funny to see you swimming in rubber boots."

"Hello! Hello!" croaked the frog boys.

"Nobody could swim in rubber boots—I mean really inside the boots—unless maybe it might be Bully and Bawly No Tail, the two frog boys," chuckled Uncle Wiggly as he set his new boots in a corner and went up to the bathroom to wash his paws and face ready for supper.

"Oh, are Bully and Bawly here?" asked Buster and Custer, two of Uncle Wiggly's little boy rabbits, as they hopped into the bungalow just then, coming from school. They had heard what his father said about the frogs.

"No, Bully and Bawly aren't here," said Mrs. Longears. "Why did you expect them?"

"They said they might come over this evening to 'help us study our home work,'" said Buster.

"Cause it's very hard home work we have to do for the Lady Mouse Teacher in the Hollow Stump School to-morrow," said Custer, sighing.

"Ha! Ha!" laughed Nurse Jane Fuzzy Wuzzy. "I can guess how much studying of home work you four boys will do once you get together talking about the fun you had to-day! Ha! Ha! Yes, indeed!"

"All right. You'll see, Nurse Jane," said Buster.

"Just wait till Bully and Bawly

To-morrow's Horoscope

WEDNESDAY, APRIL 3, 1929

Although there is a strong adverse aspect in to-day's horoscope, astrologers read that

the stars are fairly favorable to many sorts of work.

It should be a lucky day for advertising or any sort of publicity regarding commercial matters.

Newspapers and magazines should profit, for they will record and will discuss many sensational events within a fortnight, it is foretold.

This is a threatening rule of the stars for partnerships or agreements in which co-operative action is necessary.

While this planetary government prevails quarrels are easily precipitated between nations as well as individuals.

There is a sign that seems to forecast destruction of property through storms or other convulsions of nature.

The weather will be changeable all through the summer. If the stars are rightly interpreted, certain sections of the United States will suffer severely from extreme heat.

Summer resorts will have a profitable season, if the prophecies of astrologers come true.

The rise of Neptune is construed by many

seers to presage for the United States much uneasiness due to wild rumors and false alarms that excite militarists.

Crime will continue unabated this month, and frightful acts will be reported, but the stars are said to indicate a slow rising of law-abiding people.

If the seers are to be believed there has been an imperceptible turning of the tide

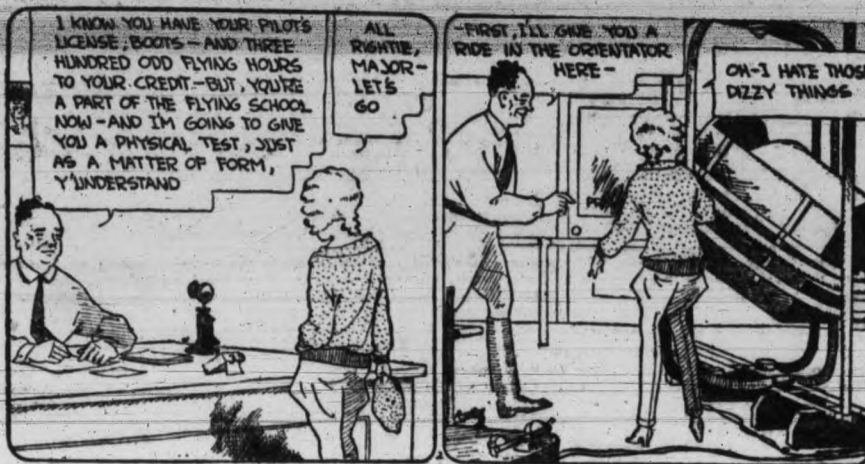

that has brought to all parts of the world the fleetness and jetson of humanity.

Persons whose birthdate it is may expect prosperity through work of the best sort. Travel is forecast.

Children born on this day probably will be keen and quick of mind, fond of detail and able to win success. The subjects of this sign often are endowed with great literary talent.

Wounded Man Says Aviator Shot Him

Saskatoon, April 2.—Suffering from a bad bullet wound in his head and carrying a .22 calibre rifle, a man who said his name was Mustanka came out of the bush at Prongue at 5 o'clock yesterday morning and knocked at the home of Mrs. O. M. Bloxham. The man declared he had been shot from an aeroplane and was taken to a doctor for medical attention and examination by Corporal Fieldhouse of the Royal Canadian Mounted Police of North Battleford. The bullet had entered the man's head through the ear and no exit wound could be found. There is possibility the man was shot by some other person, but the probability,

PROTEST REMOVAL OF MINES OFFICE

Protest against the report of a plan of the Provincial Mines Department to move the headquarters of the Western Mining District from Nanaimo are being filed with the Government in the form of resolutions from the Nanaimo Board of Trade and other public organizations on Vancouver Island. The district includes all the mining divisions on Vancouver Island and in the Nanaimo area. It has been rumored that the Government intends to move the present Nanaimo headquarters to Vancouver, acting under the authority of legislation passed by the Legislature recently. This empowers the Lieutenant-Governor-in-Council to move the headquarters of mineral districts as he sees fit. Formerly they were fixed by statute.

Heroic Cameraman's Film Shows Death Car's Charge

Death rode in Lee Bible's automobile as it shot over the sands at Daytona Beach, Fla., at 202 miles an hour—and Death crashed the camera that made the last pictorial record of the speeding car. At the top you see Bible, mechanic-driver of the Triplex, just before starting his mad dash in quest of a new world's speed record. The next three views are from the movie film of Charles Traub, Pathe Newsreel cameraman, who was killed while picturing the scene. In these you see Bible's car approaching one of the markers that lined the course, next coming alongside the marker, and then—the grim finale, when the monster machine swerved crazily along the edge of the surf and took its death-dealing turn toward Cameraman Traub. At the bottom is shown the wreckage of the car after it had crushed the heroic photographer, catapulted over a sand dune and hurled Bible to his death.

DESTINATION IS MYSTERY

Few Know Where Tolmie Is Holidaying and They Refuse to Tell

Whereabouts of Premier Tolmie, who left here Sunday afternoon on a holiday of about a month, is a complete mystery. Officials at the Parliament Buildings declared they had no idea where the Premier had gone on his mysterious vacation, and his Cabinet colleagues professed the same ignorance. The secret evidently is known to no one outside the ranks of the Cabinet, and the Cabinet is keeping it well. During the last session of the Legislature it was understood the Premier would go to California to build up his strength in the warmth of the South, but whether he carried out this plan is not known. For some months his health has given his colleagues concern, and they have been pressing him to take a rest. Here, under the continual pressure of business and the swarms of people anxious to see him, a complete recovery is regarded as almost impossible. On his return the Premier will insist that he spare himself much of the effort which he has devoted in the past to attending public functions and to traveling.

ALPINE CLUB SEES CANYON

Annual Dinner Is Preceded By Hike to Beautiful Sooke River Cut

Sooke Canyon, with its cliffs and rocks, overhanging trees and rushing water, was yesterday the objective of members of the Vancouver Island branch of the Canadian Alpine Club in a hike from Sooke. Leaving the way at 9 a.m., twenty-four members of the club proceeded by automobile to Sooke River where the hike was started. Ropes were brought into play to lower the party into the canyon. The descent was nearly 100 feet in height. After leaving the canyon, the hikers climbed over the nearby hills to an altitude of 1,100 feet from which a wonderful view of the straits was secured. The annual dinner of the club was held at the Belvedere Hotel last night. Whelan, A. C. Bell, F. G. Bell, of Vancouver, and Claude L. Harrison being the speakers. A. C. Campbell and Mr. Wheeler afterwards addressed the party on "Garibaldi Park and Rogers Pass, lantern slides being shown in the rounds of the hotel.

AT THE THEATRES

LEATRICE JOY IS STAR IN PICTURE AT THE DOMINION

As the beautiful defendant in "The Bellamy Trial," which opened yesterday at the Dominion Theatre, Leatrice Joy makes her debut as a free-lance star, a triumphant one. In the Metro-Goldwyn-Mayer mystery drama, a filmation of the famous magazine serial by Frances Noyes Hart, Miss Joy acquires herself with a splendid performance that showed her faith appreciation of the dramatic values of the part.

With Kenneth Thompson, who plays the role of Stephen Bellamy, husband of the slain woman, Miss Joy, as Susan, stands trial on a murder indictment. Since the dramatic heights of the film are attained within the courtroom action, Miss Joy's role makes unusual demands, but the poignancy of her portrayal is a delight to behold.

LEADING MAN
As leading man, Georges Barrard, well-known to stage audiences, is admirably cast as the husband whose faith in his wife's innocence is unshaken. Kenneth Thompson, also a stage favorite, is superb in the prominent role he plays.

Margaret Livingston is the woman whose murder provides motivation for the mystery plot. Betty Bronson is a reporter, as is Edward Nugent, a new British production which is a production of the stage, appear as rival attorneys.

CITY POLICE FORCE FORMS BACKGROUND FOR COLUMBIA FILM

Elliott Clawson, who worked with the City Police Force, has written the scenario for "Let Us Go Gallant," a new Columbia picture. The film, which is now at the Columbia Theatre, is a story of a big city's police force. "The Cop" brings to the screen an unusual version of the drama in the lives of those whose duty it is to maintain law and order. Ray Garnett made the adaptation and Donald Crisp directed. Jacqueline Logan, Alan Hale and George Armstrong are featured.

DOROTHY SEBASTIAN AS SOCIETY CROOK AT THE PLAYHOUSE

Dorothy Sebastian is playing at the Playhouse Theatre to-day in "The House of Scandal," a Tiffany-Stall feature in which she is supported by Pat O'Malley, Harry Murray, Ida Darig, Tina Corrado, Lee Shumway and others. Miss Sebastian plays the role of a society crook. She meets the hero, just over from Charles B. Mitchell, to be a policeman, like his brother, when she is hurt in a taxi accident. He has been taking advantage of his brother's being asleep to try on the police uniform and is therefore, mistaken for the real article. He takes the girl to her home, falls in love with her at first sight and goes to call again, entirely unsuspecting of the fact that he is in a nest of clever crooks and that a swindle game is being pulled right under his nose. This situation, it is said, makes for a lot of suspense and excitement. E. Morston Hough wrote the story and King Baggot directed.

PLENTY OF FUN FOR AUDIENCES AT THE COLISEUM

To an enthusiastic audience which packed every seat in the theatre, the Coliseum Players, under the direction of Raymond "Toby" Leitch, opened the current week at the Coliseum Theatre with a production entitled "The Balloon Girl." It may have been due to the Easter holidays, but no for many moons has the Coliseum been so crowded on a Monday evening. Every one of the box seats were gone. "The Balloon Girl" is one of the company's best efforts since coming to Victoria. It is full of life and fun and clean good humor. The plot is a deep one and holds the attention of

Where To Go To-night

THE SCREEN
Capitol—Richard Dix in "Redskin."
Columbia—Jacqueline Logan in "The Cop."
Dominion—Leatrice Joy in "The Bellamy Trial."
Playhouse—Dorothy Sebastian in "The House of Scandal."
THE STAGE
Coliseum—The Coliseum Players in "The Balloon Girl."
Crystal Garden—Swimming and Dancing.

the audience as it gradually reaches its peak point and then begins to unravel. "Toby" Leitch keeps his friends and admirers in roars of laughter by his ridiculous antics as a country policeman. He is a great man for telling stories and links up his name with such famous persons as Theodore Roosevelt, John B. Stetson and a number of others. The rest of the people on the stage have no lines to speak, telling him outright that he is a liar, which, of course, has little effect on "Toby." Forrest Taylor has a difficult role this week as a young country parson, brought into an embarrassing position when a scantily-clad circus girl drops into his house and makes herself at home. But he carries his part beautifully and gives a fine performance.

NATURAL COLOR FEATURES FILM AT THE CAPITOL

"Redskin," the new Richard Dix epic of the West, which opened for a three-day run last night at the Capitol Theatre, marks a wonderful step forward. Beautiful scenic backgrounds are revealed in all their true color and beauty. The hills and valleys of the Indian country are reproduced for the screen just as the eye sees them in nature. And the powerfully gripping story, true to Indian traditions and customs, unfolds in this native setting.

A master cast enacts this drama. Richard Dix, who made his name as a meadow success of his picture-making, "The Vanishing American," turns his thoughts to the serious drama again and records a new masterpiece worthy of place with his previous enduring epic.

On the stage this week are "The Three Tom Cates" in a novelty musical, the Marion Baker Musical Comedy Company, and Madame Millicent Raven of the Trinity College and her favorite pupil, "Sir Charles Santley," in a miniature song recital. On the same programme appears the new master of ceremonies, "Smiling" Jack Medford. Chris Wade and his Capitol stage band will feature pleasing musical specialty.

NEW TROPHIES ARE SECURED

Several Late Awards For Musical Festival This Month Are Announced

Among the new trophies donated to the Victoria Musical Festival which will take place April 16 to 20 is a challenge shield donated by the Victoria Music Company for the highest marks secured by large choral societies. A challenge cup has also been donated by the Canadian Bank of Commerce for public rural elementary school classes, a challenge cup by the Kent Piano Company for highest in folk dancing, a challenge shield by the Arion Club for folk dancing, a shield by Dean Quinlan for highest marks for Anglican church choirs. A challenge cup has been given by the B. C. Electric for the highest in folk dancing in the ten to seventeen-year class and Premier Tolmie will give a cup to the Saanich school having highest total marks. The Dominion Academy of Music has offered a scholarship consisting of one year's tuition to the one having the highest marks in piano, vocal or elocution classes. The Sprott Shaw School has offered a scholarship for the highest in two vocal, one pianoforte, one violin, one cornet or two elocution classes. The six adjudicators are musicians of the highest qualifications and carefully

chosen, and their decisions will be final. Entries in the folk-dancing classes now number thirty-three.

Church In Quebec Destroyed By Fire

Quebec, April 2.—During a severe snowstorm and gale yesterday afternoon, a bolt of lightning struck the steeple of the Roman Catholic Church in St. Paul du Buton, Montmagny County, and the structure soon was a mass of flames. The parish school nearby, under the direction of the Sisters of St. Damien, also was destroyed. The two buildings were valued at \$125,000.

Strawberry Vale

The Sunday services at Wilkinston Road United Church were well attended. The church had been beautifully decorated for the Easter service by Mrs. W. J. Jones, while the congregation listened to eloquent and inspiring messages from the pastor, Rev. H. A. Ireland. The choir rendered special music and Mrs. Pebernart of Vancouver, B.C., sang "The Holy Hour," and in the evening Mrs. W. J. Jones and Mrs. Pebernart sang the duet, "Come, Holy Spirit."

At the close of the morning service a reception service was held, at which nine members were admitted to the church and communion celebrated. On Thursday evening, April 4, the choir of St. Andrew's Presbyterian Church will render the sacred cantata, "The Atonement," in the Wilkinston Road United Church.

A jolly evening was spent in the Women's Institute Hall, Wilkinston Road, on Monday, when the W.A.T.D. class of the Wilkinston Road United Sunday School entertained a large number of friends. Lively games and contests were played in quick succession under the capable leadership of Miss Amelia Brydon. The prize winners in the contests were: Mrs. McBain, Mrs. Campion, Miss Bessie Hackney, Mrs. Quick, Miss Olive, Mrs. G. E. Eberidge and Messrs W. Morrison and F. Webb. Refreshments were served by the girls of the class.

Mr. and Mrs. Percival and children of Sooke were guests of Mrs. Eberidge, Wilkinston Road. Mrs. Hannah and daughter of Nanaimo, who have been visiting Mrs. Barr, Wilkinston Road, left for her home on Sunday, accompanied by her

CUTICURA HEALS SKIN TROUBLES

Rash Broke Out, Face Disfigured, Lost Sleep.

"My eye began to swell and a rash broke out. After a few days it would dry up and become scaly and my face started to swell. The skin itched and burned and I could not sleep nights. My face was so disfigured that I had to leave off work several times. This continued for nearly two years. Then I got a free sample of Cuticura Soap and Ointment. The inflammation went so I bought more and I used three cakes of Cuticura Soap and two boxes of Cuticura Ointment and I was healed." (Signed) S. Worsley, 403 Queen St., St. James, Winnipeg, Man. Don't forget to shampoo your hair frequently with Cuticura Soap.

When Food Sours

Sweeten the stomach—instantly.

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid. The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient and harmless. It has remained the stand-

ard with physicians in the 50 years since its invention. It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.
